QUESTION 1

After the initial configuration of CandDS, if the administrator wants to change the SMTP Server that was configured for Notification delivery, which of the following steps would she take?

A. Modify the \\'SMTP Host\\' value under Notification within the Configuration section of Deployment Manager web client.

B. Modify the \\'SMTP Host\\' value through the Configuration Properties within Server Administration tab of Deployment Manager.

C. Modify the \\'SMTP Server\\' value through the Global Settings within the Properties of the Content Repository entry of Deployment Manager.

D. Modify the \\'SMTP Server\\' value through the Global Settings within the Tools menu of Deployment Manager.

Correct Answer: A

QUESTION 2

An administrator applied a patch to the CandDS installation and started the server. A user, using the Deployment Manager windows client, is complaining that an issue that the patch should have fixed in the client is not working. What should the administrator check to resolve this?

A. Ensure the user downloaded and manually installed the corresponding client patch.

B. Verify if the client license is still valid.

C. The only way to install a client update is to re-download the Deployment Manager client from the server. Make sure that this has been done.

D. Ensure the user restarted the Deployment Manager Windows client, after having received a version update message.

Correct Answer: D

QUESTION 3

To enable collaboration of Modeler with CandDS, where should the Modeler adapters be installed?

A. On the server hosting the Modeler Server

B. On the server hosting the CandDS Server

C. On both Modeler Server and on the CandDS server

D. On the Modeler client

Correct Answer: B

QUESTION 4
