QUESTION 1

A company wants to purchase and implement OnDemand to archive customer billing statements. Due to the amount of data to be archived, they want to use Tivoli Storage Manager (TSM) to store all statements older than one year on cartridge tape. The company doesn't plan to implement TSM until next year and is asking questions about the logic of their plan.

What is your response?

- A. OnDemand and TSM must be installed at the same time to accomplish their goal.
- B. OnDemand can be installed now and TSM can be added at any time in the future with no special considerations.
- C. OnDemand can be installed now and TSM can be added at any time in the future as long as any storage sets are created with this in mind.
- D. OnDemand can be installed now and TSM can be added at any time in the future, but any data archived before TSM is installed will have to be reloaded.

Correct Answer: C

QUESTION 2

An Application Group was created with Create Tablespace Type set to None. After loading many months of data to the Application Group, the administrator decides to move the data from the default Tablespace to an SMS (System Managed Space) tablespace.
