Correct Answer: A

---

#### QUESTION 2

In order to store data in an OnDemand system, a Storage Set must include which of the following?

- A. Application Group
- B. Folder
- C. Primary node
- D. Storage node

Correct Answer: C

---

#### QUESTION 3

A report that has been archived into OnDemand suddenly fails to load. The OnDemand system administrator investigates and determines that the format of the report has changed. What action should be taken?

- A. modify the view information in the application
- B. modify the indexer parameters in the application
- C. modify the load information in the application
- D. modify the field information in the application group

Correct Answer: B

---

#### QUESTION 4

An OnDemand \_\_\_\_\_ maintains data for a certain length of time on certaintype(s) of media.

- A. application
- B. application group
- C. cabinet
- D. folder
- E. storage set

Correct Answer: E

---

#### QUESTION 5

A company wants to purchase and implement OnDemand to archive customer billing statements. Due to the amount of data to be archived, they want to use Tivoli Storage Manager (TSM) to store all statements older than one year on cartridge tape. The company doesn't plan to implement TSM until next year and is asking questions about the logic of their plan.

What is your response?

- A. OnDemand and TSM must be installed at the same time to accomplish their goal.
- B. OnDemand can be installed now and TSM can be added at any time in the future with no special considerations.
- C. OnDemand can be installed now and TSM can be added at any time in the future as long as any storage sets are created with this in mind.
- D. OnDemand can be installed now and TSM can be added at any time in the future, but any data archived before TSM is installed will have to be reloaded.

Correct Answer: C
