-  **800,000+** Satisfied Customers

### QUESTION 1

Which one of the following options is CORRECT?

- A. In both DB2 pureScale and HADR environments data is available all the time.
- B. DB2 pureScale transfers log files from a primary database to a standby database.
- C. HADR persists data in the cluster caching facilities (CFs).
- D. In a pureScale environment, the data is available all the time, while in a HADR environment the data is available most of the time.

Correct Answer: D

---

### QUESTION 2

What is the DB2 Design Advisor?

- A. The DB2 Design Advisor is a tool that automatically analyzes your running database and continuously makes changes to your database to give it peak performance.
- B. The DB2 Design Advisor is a help desk facility that is available to all licensed DB2 owners that have paid their maintenance agreements with IBM. The tool is a web site that guides you through the design of your database, with the DBA responding to a series of questions. It produces a database schema that allows for quick database creation.
- C. The DB2 Design Advisor is a tool that can help you improve your database workload performance. Given a set of SQL statements in a workload, the Design Advisor can generate recommendations to improve the performance of SQL execution.
- D. The DB2 Design Advisor is a tool that can be used to automatically create tables based on a physical data diagram.

Correct Answer: C

---

### QUESTION 3

A database administrator executed a `db2iupdt` command in order to drop a cluster caching facility from a DB2 pureScale cluster. Which command can be used to verify that the cluster caching facility is no longer part of the cluster?

- A. `db2instance -display -cluster -modifications`
- B. `db2instance -list -cfs -details`
- C. `db2instance -all -cfs`
- D. `db2instance -list`

Correct Answer: D

---

#### QUESTION 4

Which one of the following sentences does NOT describe a benefit of Temporal Tables?

- A. Temporal tables increase business insight by letting analysts understand how the business was doing in the past, what has changed in the present, what are the projections for the future.
- B. Temporal tables lower costs by eliminating the complexity for businesses to develop their own temporal support infrastructure, such as additional tables, triggers, and application logic.
- C. Temporal tables allow better data management by letting the application control data integrity and uniqueness.
- D. Temporal tables provide a quick and easy way to track and record data changes in the table.

Correct Answer: C

---

#### QUESTION 5

Consider the scenario where a client application is connected to DB2 pureScale "member 1". The DB2 pureScale environment has three DB2 pureScale members. In a situation where "member 1" fails, the client is still able to execute operations against the DB2 pureScale cluster with minimal interference. Which of the following technologies allow the client to continue performing operations?

- A. Decentralized log files for member recovery.
- B. Geographically Dispersed pureScale Cluster (GDPC).
- C. Automatic Client Reroute.
- D. Redundant cluster caching facility.

Correct Answer: C
