Correct Answer: A

QUESTION 3

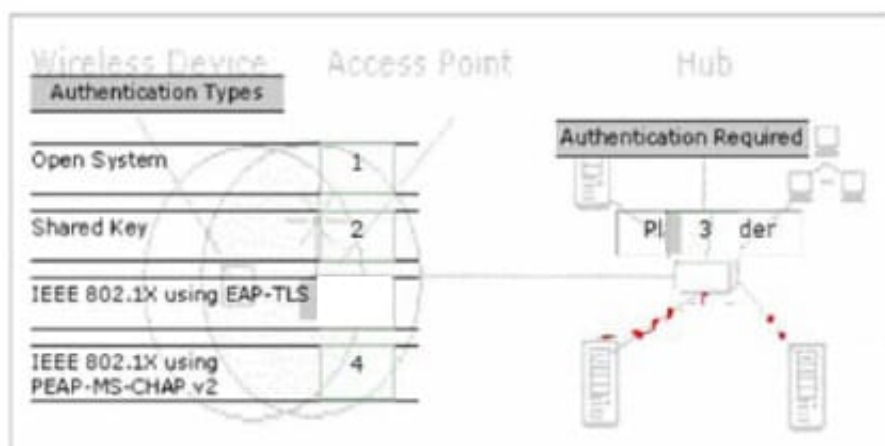

You work as a Network Administrator for Tech Perfect Inc. The company has a Windows Server 2008 network environment. The network is configured as a Windows Active Directory-based single forest single domain network. The company has recently provided laptops to its sales team members. You have configured access points in the network to enable a wireless network. The company's security policy states that all users using laptops must use smart cards for authentication. Select and place the authentication method you are required to configure to implement the security policy of the company.

Select and Place:

Correct Answer:

QUESTION 4

Your client has a brand new laptop. He is trying to connect to his home network, which is using an older (802.11b) wireless router. The router is set for encryption but not MAC filtering. What is the most likely problem?

- A. His physical address for the laptop is not in the router.
- B. His laptop is using the WPA encryption protocol.
- C. The laptop does not have a wireless NIC.
- D. His laptop has a newer operating system that cannot communicate with the router.

Correct Answer: B

QUESTION 5
