QUESTION 1

A Web developer with your company wants to have wireless access for contractors that come in to work on various projects. The process of getting this approved takes time. So rather than wait, he has put his own wireless router attached to one of the network ports in his department. What security risk does this present?

- A. None, adding a wireless access point is a common task and not a security risk.
- B. An unauthorized WAP is one way for hackers to get into a network.
- C. This circumvents network intrusion detection.
- D. It is likely to increase network traffic and slow down network performance.

Correct Answer: B

QUESTION 2

You work as a Network Administrator for Infonet Inc. The company's office has a wireless network. Wireless access point on the network works as a router and DHCP server. You want to configure a laptop to connect to the wireless network. What will you configure on the laptop to accomplish the task?

- A. Internet service provider's DNS server address
- B. Service Set Identifier
- C. I/O address
- D. Demilitarized zone

Correct Answer: B

QUESTION 3

Which of the following IEEE 802.11 amendments can use three radio chains per band to transmit data?

- A. IEEE 802.11h
- B. IEEE 802.11g
- C. IEEE 802.11n
- D. IEEE 802.11a

Correct Answer: C

**QUESTION 4**

You work as a Network Administrator for Tech Perfect Inc. You want to implement a wireless LAN network for the company and set up basic wireless connectivity. In order to perform this task you have to follow some process. Choose the correct process to set up a functional wireless LAN network and arrange the process in a proper sequence.

Set up a functional WLAN

Process

Build the controller interface
Modify the security settings
Create the WLAN
~~Define a modulation scheme~~
Connect the WLAN to the controller
Configure SSH

Correct Answer: Please check the answer in explanation

Set up a functional WLAN

Build the controller interface
Create the WLAN
Connect the WLAN to the controller
Modify the security settings

Process

Configure SSH
Define a modulation scheme

QUESTION 5

At what impedance are wireless LAN cables and devices rated?

- A. 75 ohms
- B. 60 ohms
- C. 50 ohms
- D. 10 ohms

Correct Answer: C
