QUESTION 1

What layer of the OSI reference model is responsible for data framing for a given physical layer technology?

A. Transport

B. Network

C. Data Link

D. Session

E. Presentation

F. Application

Correct Answer: C

QUESTION 2

ABC Company is comprised of four departments: sales, marketing, engineering, and accounting. The company would like to separate the users on the WLAN so that users from different departments have access to different services on the network. To implement this strategy, you recommend a WLAN controller that supports _____.

A. Role Based Access Control (RBAC)

B. Preshared Key (PSK)

C. Extended Service Set Identifiers (ESSIDs)

D. Multiple Input Multiple Output (MIMO)

E. Wireless Intrusion Protection System (WIPS)

Correct Answer: A

QUESTION 3

In order to assess your customer\\'s Wi-Fi network needs, you have arranged an initial meeting with your customer\\'s representatives and your systems engineer. So that you can request cooperation and input from all stakeholders, which individuals from your customer\\'s company should you invite to this functional requirements meeting? (Choose 2)

A. Network administrator

B. Wireless end users

C. Director of Human Resources

D. Software engineering manager

E. Facilities manager

Correct Answer: AE

QUESTION 4

dBi is a(n) _____ measurement of gain introduced by _____?

A. absolute; an access point

B. absolute; cables and connectors

C. relative; an antenna

D. relative; a radio chain

Correct Answer: C

QUESTION 5

After successfully connecting to the Wi-Fi network in your hotel room, you launch a web browser on your laptop. Instead of opening your homepage, it directs you to a hotel- branded page that asks for your name, room number, and a secret key. What has most likely happened?

A. You are the victim of a phishing attack, should not provide the information, and should call the front desk for help.

B. Every room in the hotel has its own access point, and entering the room number and key confirms connectivity to the correct AP.

C. The access point is out of connections and you must enter your room number and code to be added to the hotel\\'s Access Request Queue (ARQ) to obtain the next available connection.

D. The hotel is using a captive portal to provide guest connectivity while keeping non-guest users off the wireless network.

Correct Answer: D
