QUESTION 1

Select the statement that correctly describes the Wi-Fi Alliance\\'s primary role in the WLAN industry.

A. The Wi-Fi Alliance is a WLAN industry analyst firm that reports market trends and developments.

B. The Wi-Fi Alliance ensures interoperability of band selection and power settings across regulatory domains.

C. The Wi-Fi Alliance creates compliance standards around which vendors can develop products.

D. The Wi-Fi Alliance creates recommended practices by which the IEEE can test and certify product interoperability.

E. The Wi-Fi Alliance tests and certifies product interoperability based upon standards created by the IEEE.

Correct Answer: E

QUESTION 2

What statement accurately describes an advantage of manual RF site surveys over predictive site surveys?

A. Manual site surveys are useful for locating and identifying sources of RF interference, while predictive site surveys are not capable of this task.

B. Manual site surveys are more efficient than predictive site surveys in large facilities because GPS mapping can be used.

C. Manual site surveys are more accurate than predictive site surveys because they take advantage of complex computer simulations.

D. Manual site surveys allow the site surveyor to create a static RF environment, whereas predictive site surveys are subject to changes in the RF environment.

Correct Answer: A

QUESTION 3

What layer of the OSI reference model is responsible for data framing for a given physical layer technology?

A. Transport

B. Network

C. Data Link

D. Session

E. Presentation

F. Application

Correct Answer: C

QUESTION 4

After successfully connecting to the Wi-Fi network in your hotel room, you launch a web browser on your laptop. Instead of opening your homepage, it directs you to a hotel- branded page that asks for your name, room number, and a secret key. What has most likely happened?

A. You are the victim of a phishing attack, should not provide the information, and should call the front desk for help.

B. Every room in the hotel has its own access point, and entering the room number and key confirms connectivity to the correct AP.

C. The access point is out of connections and you must enter your room number and code to be added to the hotel\\'s Access Request Queue (ARQ) to obtain the next available connection.

D. The hotel is using a captive portal to provide guest connectivity while keeping non-guest users off the wireless network.

Correct Answer: D

QUESTION 5

When implementing a wireless LAN, what is the area covered by an AP and usable by a client station called?

A. Basic Service Area

B. Independent Basic Service Set

C. Infrastructure Basic Service Set

D. Service Set Identifier

E. Basic Service Set Identifier

Correct Answer: A
