

# PW0-100<sup>Q&As</sup>

Certified wireless network administrator(cwna)

## Pass CWNP PW0-100 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.passapply.com/PW0-100.html>

100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by CWNP  
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

### QUESTION 1

What three cipher suites are specified by the IEEE 802.11-2007 standard? (Choose three)

- A. Counter Mode with CBC-MAC Protocol
- B. Wi-Fi Protected Access v1 and v2
- C. Internet Protocol Security
- D. Extensible Authentication Protocol
- E. Internet Key Exchange v2
- F. Wired Equivalent Privacy
- G. Temporal Key Integrity Protocol

Correct Answer: AFG

---

### QUESTION 2

Using the exhibit as a reference,

what is the maximum number of spatial streams that could be used for a downlink HT-OFDM transmission from AP-1 to STA-3?

- A. One spatial stream, because the BSS must maintain backwards compatibility with STA-2, which supports only 802.11g (ERP) without MIMO or multiple spatial streams.
- B. Two spatial streams, because the number of spatial streams for an HT-OFDM transmission is limited to the capabilities of the least capable HT station in the BSS.
- C. Two spatial streams, because the third transmit chain in the HT AP must be used simultaneously for protection mechanisms with the 802.11g (ERP) station.
- D. Three spatial streams, because HT-OFDM transmissions will be preceded with protection mechanisms using a basic data rate for STA-2 and possibly STA-1.

Correct Answer: D

### QUESTION 3

Prior to association, what parameter can 802.11 client devices measure and use to select the optimal access point for association?

- A. Signal strength of access point beacons

- B. Proximity to potential access points
- C. Retry rate of probe request and response frames
- D. Average round trip time to reach the IP gateway
- E. Number of nearby RF interference sources

Correct Answer: A

---

#### QUESTION 4

The IEEE 802.11-2007 standard requires ERP capable devices to be backward compatible with devices using which other 802.11 physical layer specifications (PHYs)? (Choose two)

- A. DSSS
- B. FHSS
- C. HR/DSSS
- D. ERP-PBCC
- E. DSSS-OFDM

Correct Answer: AC

---

#### QUESTION 5

Given: XYZ Corporation is experiencing connectivity problems with their existing building-to-building bridge link. A concrete wall on the roof of one building is partially blocking the Fresnel Zone, and the connection is dropping many frames. The administrator moves the antenna to an area not obstructed by the concrete wall and then realizes the RF cable cannot reach the new location.

If an extension cable is added to move the antenna, what are the likely results?

- A. The data throughput rate will increase because VSWR will decrease.
- B. The Equivalent Isotropically Radiated Power (EIRP) will decrease.
- C. The antenna's azimuth beamwidth will decrease.
- D. The size of the Fresnel zone will increase.
- E. The likelihood of a direct lightning strike will increase.

Correct Answer: B
