-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

QUESTION 1

Given: You are the network administrator for ABC Company. Your manager has recently attended a wireless security seminar. The seminar speaker taught that a wireless network could be hidden from potential intruders if you disabled the broadcasting of the SSID in Beacons and configured the access points not to respond to Probe Request frames that have a null SSID field.

Your manager suggests implementing these security practices. What response should you give to this suggestion? (Choose two)

- A. Any 802.11 protocol analyzer can see the SSID in clear text in frames other than Beacons and Probe Response frames. This negates any security benefit of trying to hide the SSID in Beacons and Probe Response frames.
- B. This security practice prevents manufacturers' client utilities from detecting the SSID. As a result, the SSID cannot be obtained by attackers, except through social engineering, guessing, or use of a WIPS.
- C. Although it does not benefit the security posture, hiding the SSID in Beacons and Probe Response frames can be helpful for preventing some users (such as guests) from attempting to connect to the corporate network.
- D. Any tenants in the same building using advanced penetration testing tools will be able to obtain the SSID by exploiting WPA EAPOL-Key exchanges. This poses an additional risk of exposing the WPA key.
- E. To improve security by hiding the SSID, the AP and client stations must both be configured to remove the SSID from association request and response frames. Most WLAN products support this.

Correct Answer: AC

QUESTION 2

When a client moves to a new BSS within an ESS, what steps are part of the 802.11 reassociation process? (Choose two)

- A. The client station transmits a Reassociation Request frame to its current access point.
- B. The current access point informs the IP gateway of the reassociation.
- C. The current access point triggers the client's reassociation service.
- D. The new access point transmits a Reassociation Response to the client station with a status value.
- E. The client and new access point create unicast encryption keys.
- F. The client station transmits a deauthentication frame to the current access point.

Correct Answer: DE

QUESTION 3

What is the general type and purpose of the application shown in the exhibit?

- A. Laptop-based Site Survey Utility - Creating a list of necessary APs and plotting their locations on a floor plan
- B. Wireless Network Management System - Managing multiple autonomous APs through the SNMP protocol
- C. 802.11 Protocol Analyzer - Capturing and decoding 802.11 frames for the purpose of troubleshooting and optimization
- D. Laptop-based Spectrum Analyzer - Monitoring the RF spectrum for interference sources and improper system operation
- E. WLAN Discovery Tool - Locating and identifying secured and unsecured WLAN access points
- F. Wireless Intrusion Protection System - Monitoring 802.11 frame exchanges for performance and security analysis and reporting

Correct Answer: E

QUESTION 4

What is the approximate beamwidth of the antenna displayed in the exhibit?

- A. 15 degrees
- B. 30 degrees
- C. 50 degrees
- D. 70 degrees
- E. 120 degrees

Correct Answer: B

QUESTION 5

What features are most often configurable within 802.11 WLAN client utilities? (Choose two)

- A. Frame generator utility
- B. Power management

C. Co-channel interference threshold

D. Roaming aggressiveness

E. AES key and block size

Correct Answer: BD
