QUESTION 1

An organization has the following requirements for a server\\'s backup data: Two copies need to be retained for the same backup data. One copy needs to be sent to disk with a retention period of one month. A second copy needs to be sent to tape with a retention period of six months. The copy on disk may only be automatically deleted by Symantec NetBackup 7.0 after one month. Because of licensing, this must be configured avoiding using storage lifecycle policies. How can a Symantec NetBackup 7.0 administrator configure a backup policy, maximizing automation, to meet these requirements?

A. create a basic disk staging storage unit with a fixed retention of one month and staging to tape with a retention of six months; configure the backup policy to use this disk

B. configure the backup policy to back up to a basic disk with retention of one month; run the bpduplicate command to duplicate to tape with retention of six months

C. configure two identical schedules for the same policy, then configure one schedule to go to a basic disk with retention of one month and configure the other schedule to go to tape with retention of six months

D. configure the backup policy so that the schedule runs multiple backups: one to basic disk with one month retention, and one to tape with six months retention

Correct Answer: D

QUESTION 2

Which statement best describes your ability to back up and recover Symantec NetBackup 7.0 catalogs?

A. I can back up and recover Symantec NetBackup 7.0 catalogs WITHOUT assistance.
