### QUESTION 1

You need to perform data conversion on a sequence of elements in a business event schema, but it is not part of the TIBCO XPATH implementation. How do you solve this problem in the most efficient manner?

- A. TIBCO BusinessWorks does not support the feature.
- B. You implement an adapter to expand the function set.
- C. You write a Java Custom activity to handle the business event data.
- D. You create a Java Custom function to handle the business event data.

Correct Answer: D

---

### QUESTION 2

Which activity should you choose when you want to write the output of any or all activities and process variables to a file and/or stdout?

- A. Notify activity
- B. Mapper activity
- C. Inspector activity
- D. Write File activity
- E. Render Data activity

Correct Answer: C

---

### QUESTION 3

What is the significance of using the spawn option with a BusinessWorks process definition Call Process activity?

- A. The subprocess can bind data back to the caller when it ends and the subprocess has its own thread.
- B. There will be no data bound back to the caller when the subprocess ends and the subprocess has its own thread.
- C. The subprocess can bind data back to the caller when it ends and the subprocess shares the same thread as the calling process.
- D. There will be no data bound back to the caller when the subprocess ends and the subprocess shares the same thread as the calling process.

Correct Answer: B

---

#### QUESTION 4

What are three different types of access privileges available for TIBCO Administrator GUI components? (Choose three.)

- A. Read
- B. Write
- C. Delete
- D. Execute
- E. Administer

Correct Answer: ABE

---

#### QUESTION 5

You are developing a BusinessWorks process definition which (after a '\\Mapper\_All' activity has completed) has two independent database updates to perform, one to a SQL 7.0 database and one to an Oracle 8.1 database. What can you do to minimize the elapsed time for this process?

- A. perform the two database JDBC Update activities in parallel
- B. use a JDBC Query activity to present the update statements
- C. use a common JDBC Connection for each JDBC Update activity
- D. perform the two database JDBC Update activities in sequence with no other intervening activities

Correct Answer: A
