QUESTION 1

What are three reasons to create or import a Business Object Model in TIBCO Business Studio? (Choose three.)

- A. For analysis purposes
- B. To incorporate business data in your business processes
- C. For use in the Organization Model
- D. For documentation purposes E. To create the help file

Correct Answer: ABD

QUESTION 2

Which two statements are true about Supervised Views? (Choose two.)

- A. By default, there is one pre-defined Work View in the Supervised Work folder.
- B. A Supervised View can only be temporary and lasts for the duration of a session.
- C. Supervised Views of an organizational entity can contain both Offered and Allocated work items.
- D. There are two types of Supervised Views: Individual Resource and Organizational Entity.

Correct Answer: CD

QUESTION 3

Click the Exhibit button.

The process shown in the exhibit contains User tasks A, B, C, D, E, F. These task can all be enabled at the same time. Another User task. Client Cancels, is enabled all of the time to handle any unexpected contact from the customer.

It is required that when Client Cancels is completed, User tasks A, B, D, E must be withdrawn if they are still enabled. However, tasks C and F must be left unchanged. A Throw Signal Event is placed after Client Contacts completes.

Which two patterns might be used to satisfy this use case? (Choose two.)

- A. Place a matching Catch Signal Event on the boundary of each of User tasks A, B, D, E
- B. Place User tasks A, B,D,E in an embedded sub-process, and put a Catch Signal Event on its boundary
- C. Place an End Event of type Terminate Process after the Client Cancels User task Place a Catch Error Event on the boundary of each of User tasks A, B, D, E

Correct Answer: AB

QUESTION 4

Which two factors must be considered when exposing processes as services? (Choose two.)

- A. For any of the events that are exposed as one-way operations, there are no Message End Events.
- B. For any task or event to be exposed as a service, a JMS transport is required.
- C. For any of the Receive tasks that are exposed as a service, there could be a Message End Event.
- D. For any of the Receive tasks that are exposed as a service, there could be a Message Start Event that generates a reply.

Correct Answer: AC
