QUESTION 1

You have been assigned as a mentor to a new hire within the virtualization group who has asked to you to explain what Site Recovery Manager does. You tell her that after a disaster or in anticipation of a disaster-type event, Site Recovery Manager:

- A. Before the disaster event, SRM replicates specified VMs at the recovery site and powers them on, so that it can switch control to the recovery site VMs after a disaster
- B. Leverages vSphere Replication to move VMs offsite
- C. Automatically reboots specified ESXi servers and VMs in place at your local datacenter as the earliest opportunity
- D. Moves your VMs to a public cloud provided by an approved third party provider

Correct Answer: B

QUESTION 2

You manage a complex environment consisting of several hundred virtual machines running on vSphere ESXi 5.5 and 50 physical servers running applications.

Which solution will allow you to most easily virtualize the physical servers locally while moving your existing virtual machines off-site to a cloud service provider, where they will be protected against failure?

- A. vCenter Orchestrator
- B. vCloud Hybrid Service
- C. vCloud Automation Center
- D. vCenter Server

Correct Answer: B

QUESTION 3

You work at a small, but rapidly expanding chain of retail stores. You have a private cloud in place which works well most of the year, but to manage the annual holiday peak load on your Internet store, you have decided to utilize a hybrid cloud as needed. Which two components are required when deploying a hybrid cloud environment? (Choose two.)

- A. vFabric Hyperic
- B. vCloud Connector
- C. vCenter Operations Management Suite
- D. vCloud Director

Correct Answer: BD

QUESTION 4

Your development group tells you they are having problems with a specific application, but only when it's running on Ubuntu. It works fine on all other operating systems. Which product will best address this issue?

- A. vCloud Connector
- B. vFabric Hyperic
- C. vFabric Application Director
- D. vCenter Server

Correct Answer: B

QUESTION 5

Your company has identified a standard, consistent configuration for the VMs which will be deployed in your private cloud. Senior IT staff realizes there are circumstances that, from time to time, require minor deviations from these standard VMs by certain users. Which of the following allows users to deploy standard VMs without approval and also allows you to set a policy which specifies when an approval process is required?

- A. vCenter Orchestrator
- B. vCloud Automation Center
- C. vCloud Director
- D. vCloud Connector

Correct Answer: B
