QUESTION 3

Your development team needs to create a deployment specification one time and then be able to deploy the app many times across private, public, and hybrid cloud environments. The app must also work seamlessly across a variety of hardware specifications.

Which vCloud Application Director feature will you use to create a deployment plan which can be reused?

- A. App Template
- B. Road Map
- C. Blueprint

D. Deployment Guide

Correct Answer: C

QUESTION 4

A newly-hired member of your team asks you to explain Site Recovery manager to her. You tell her that after a disaster or in anticipation of a disaster-related event, Site Recovery Manager takes which action?

- A. SRM automatically reboots specified ESXi servers and VMs in place at your local datacenter as the earliest opportunity.
- B. SRM moves your VMs to a public cloud provided by an approved third party provider.
- C. SRM leverages vSphere Replication to automate the failover of VMs to another physical location.
- D. Before the disaster event, SRM replicates specified VMs at the recovery site and powers them on, so that it can switch control to the recovery site VMs after a disaster.

Correct Answer: C

QUESTION 5

Your organization has decided to use a hybrid cloud. During the weekly staff meeting, a colleague asks why the decision to use a hybrid cloud was made. Which scenarios best show the use case for a hybrid cloud? (Choose two.)

- A. You are a small company and do not want to deal with your own datacenter and equipment
- B. You want to periodically offload high demand development test cycles
- C. You want to occasionally move data between different corporate private clouds
- D. You have a mixture of physical and virtual servers

Correct Answer: AB
