D. none of the above

Correct Answer: A

QUESTION 2

How many vApps can a guest virtual machine be placed into?

A. 1

B. 64

C. 8

D. 12

Correct Answer: A

QUESTION 3

You are designing a VMware HA cluster. Due to project requirements, it has been agreed that the admission control policy is based on the number of host failures tolerated per cluster. However, because there are a number of small web servers and one large database server with large reservations, the slot size has been manually configured. What is the impact of this configuration?

A. DRS will not automatically defragment the resources in the event of a failure.

B. DRS will automatically defragment the resources in the event of a failure.

C. DPM cannot be used in this configuration.

Correct Answer: A

QUESTION 4

A project requirement must always be met.

A. True

B. False

Correct Answer: A

QUESTION 5

vApp startup order can be configured to work with VMware Heartbeat status.

A. True

B. False

Correct Answer: A
