### QUESTION 1

An administrator is enabling Network I/O Control (NIOC) on a vSphere Distributed Switch. Which types of network traffic can be prioritized with NIOC by default? (Choose three.)

- A. FCP Traffic
- B. NFS Traffic
- C. Virtual Machine Traffic By Virtual Machine
- D. iSCSI Traffic
- E. vSphere Replication (VR) Traffic

Correct Answer: BDE

---

### QUESTION 2

Which three requirements must be met in order to use Storage I/O Control? (Choose three.)

- A. The datastore must contain multiple VMFS extents.
- B. The datastore must contain a single NFS volume.
- C. The datastore must not include virtual machines with snapshots.
- D. The datastore must be managed by a single vCenter Server.
- E. Array-based automated storage tiering must be explicitly certified.

Correct Answer: BDE

---

### QUESTION 3

The Power and Suspend buttons for a virtual machine can be configured from the Options tab of the virtual machine. What are the two default actions that are configured for these buttons? (Choose two.)

- A. The Suspend button suspends the VM though the guest OS.
- B. The Power button does a graceful shutdown.
- C. The Power button does a hard shutdown.
- D. The Suspend button suspends the VM though ESXi.

Correct Answer: BD

---

### QUESTION 4

An administrator has received calls about a virtual machine experiencing intermittent application issues during the evening. To troubleshoot, the administrator needs to capture the virtual machine in the state it is in during the evening hours for later analysis. Which two tasks would accomplish this requirement? (Choose two)

- A. Create a scheduled task to clone the virtual machine once per evening
- B. Create an alarm that is triggered when a loss of VMware Tools heartbeat to the virtual machine occurs.
- C. Use esxtop in batch mode and capture metrics during the evening hours.
- D. Create a scheduled task to create a snapshot of the virtual machine once per evening

Correct Answer: CD

---

#### QUESTION 5

Before you upgrade an ESXi host:

- A. update the ESXi restore CD with the current ESXi image
- B. save the current ESXi image to another ESXi server
- C. copy the embedded ESXi image to a USB flash drive
- D. save the ESXi configuration using `vicfg-cfgbackup s` from the vCLI

Correct Answer: D
