### QUESTION 1

A system administrator is unable to clone a windows 2008 server while connected directly to an ESXi host through vSphere Client. Which two methods can be used to complete the task? (Choose two.)

- A. Connect to vCenter Server and retry the operation.
- B. Use VMware Converter to perform the operation.
- C. Connect to the host using the Web Client and retry the operation.
- D. Use VMware Configuration Manager to perform the operation.

Correct Answer: AB

---

### QUESTION 2

An administrator receives the following error message: Unmanaged I/O workload detected on shared datastore. Which vSphere feature is the likely source of this error?

- A. Network I/O control
- B. Storage I/O control
- C. Storage DRS
- D. HA datastore heartbeats

Correct Answer: B

---

### QUESTION 3

An administrator is planning a vSphere Fault Tolerance implementation for 6 virtual machines. Which two virtual disk types are supported with FT? (Choose two.)

- A. Raw Device Mapped LUN configured for Virtual Compatibility Mode
- B. Raw Device Mapped LUN configured for Physical Compatibility Mode
- C. Virtual disk thick provisioned, eager zeroed
- D. Virtual disk thick provisioned, lazy zeroed

Correct Answer: AC

---

#### QUESTION 4

A vSphere administrator needs to enable Distributed Resource Scheduling (DRS) in an existing vSphere environment:

The environment contains a High Availability (HA) cluster with eight ESXi hosts.

Six ESXi hosts are not in a cluster.

DRS should be used on as many hosts as possible.

Initial placement of virtual machines should be automatically performed.

Migration recommendations should be provided, but not performed without approval. Which procedure should the administrator perform to accomplish this task?

A.

Select the datacenter and create a DRS cluster. Add the six remaining hosts to this cluster, then enable DRS. Edit the DRS settings and change the automation level to Partial.

B.

Select the existing HA cluster. Add the six remaining hosts to the cluster. Enable DRS, then edit the settings and change the automation level to Manual.

C.

Select the datacenter and create a DRS cluster. Add the six remaining hosts to this cluster, then enable DRS. Edit the DRS settings and change the automation level to Manual.

D.

Select the existing HA cluster. Add the six remaining hosts to the cluster. Enable DRS, then edit the settings and change the automation level to Partial.

Correct Answer: D

---

#### QUESTION 5

A vSphere administrator is unable to vMotion a virtual machine between two hosts. An error message indicates that the USB device is not accessible on the target host. What is causing this issue?

A. The USB device was not enabled for vMotion when it was added to the virtual machine.

B. ESXi does not support vMotion with a USB device attached to the virtual machine.

C. The VMkernel port for vMotion is not enabled for USB traffic.

D. The virtual machine has the wrong USB controller installed.

Correct Answer: A
