### QUESTION 1

Alibaba Cloud provides powerful security services (the same level of security services used to support Alibaba Group double 11 shopping festival). However, you have to pay first before using any of the security services.

- A. TRUE
- B. FALSE

Correct Answer: B

---

### QUESTION 2

Alibaba Cloud does not support Intranet communication between products that are not in the same region, which does not mean \_\_\_\_\_?

- A. ECS instances in different regions cannot communicate with each other on the intranet.
- B. ECS instances and other products in different regions, such as ApsaraDB for RDS and OSS instances, cannot communicate with each other on the intranet.
- C. Server Load Balancer cannot be deployed for ECS instances in various regions.
- D. Server Load Balancer can be deployed for ECS instances in various regions.

Correct Answer: B

---

### QUESTION 3

Alibaba Cloud OSS is a cloud storage service that features massive capacity, outstanding security, low cost, and high reliability. To control the access to the files stored on OSS, OSS provides multiple access permissions for each bucket.

These bucket permissions are \_\_\_\_\_. (Choose three.)

- A. Private-read
- B. Public-read-write
- C. Public-read
- D. Private

Correct Answer: BCD

---

#### QUESTION 5

Company A builds a sales management platform based on Alibaba Cloud services, using 3 ECS instances. One of the ECS instance has MySQL installed as the database server of the platform, the other two are used as WEB servers. After some time, due to the rapid increase of employees and sales analysis requests, the performance of the platform is challenged in terms of response time. Through CloudMonitor, it is found that the average CPU usage reaches 70% for the two WEB server ECS instances and the database load reaches 75% for the database server ECS instance. In this situation, company A may choose which Alibaba Cloud services to improve the performance \_\_\_\_\_. (Choose two.)

- A. Use content delivery network, CDN, to accelerate the caching of the platform's css, JavaScript files etc.
- B. By adding a SLB instance and increase the number of ECS instances to reduce the work load on current ECS instances.
- C. Use RDS to replace existing self-built database, in order to obtain better database performance; also creating RDS read-only instances to handle read-only requests, hence reduce the work load on master RDS instance.
- D. Import data into OSS to share the storage load of the platform.

Correct Answer: BC
