QUESTION 1

When using Monitor Sessions with a destination of the CPU, it is impossible to forward an entire 10Gbps worth of traffic due to internal COPP policies.

How might you successfully use this feature given these constraints?

A. You just have to live with it.

B. Use packet truncation.

C. Use ACL filters applied to the mirror session.

D. Buy a switch with a larger TCAM.

Correct Answer: C

QUESTION 2

What does Arista use as a filename extension when creating EOS extensions?

A. .swix

B. .ext

C. .extension

D. .swx

Correct Answer: A

Reference: https://eos.arista.com/packaging-and-installing-eos-extensions/

QUESTION 3

Which of the following statements are true?

A. VMTracer\\'s Adaptive Segmentation feature will automatically add or prune VLANs learned from vCenter from every trunk between two known ESXi hosts so long as they are connected using Arista switches.

B. VMTracer\\'s Adaptive Segmentation feature will automatically add or prune VLANs learned from vCenter from the trunks connecting to the local switch on which the local ESXi host is connected.

C. VMTracer\\'s Adaptive Segmentation feature will automatically add or prune VLANs learned from vCenter everywhere in the network.

D. VMTracer\\'s Adaptive Segmentation feature will automatically add or remove VLANs on the switch, but it does not add or prune VLANs from trunks.

Correct Answer: B

QUESTION 4

What must be active on the VMware side in order for EOS to have visibility into vNIC counters?

A. vSwitches must be used.

B. Distributed switches must be used.

C. vSphere must be used.

D. vNIC counters are not supported in VMTracer.

Correct Answer: A

QUESTION 5

When you fullrecover a switch from Aboot and a USB drive is present in the USB port of the switch, which of the following statements is true?

A. Everything on the USB drive is deleted.

B. Only Arista-sourced files are copied from the USB drive to flash: and the switch reboots.

C. If the USB drive contains a fullrecover file and a boot-config file with a timestamp different than the one on USB flash drive, then the USB Drive\\'s contents will be copied to flash, after which the switch will reboot.

D. Nothing. The USB port is disabled when Aboot is active.

Correct Answer: C

Reference: https://eos.arista.com/password-recovery-return-to-factory-default/ (how to prepare the USB drive)
