QUESTION 1

One of your teams has noticed a spelling mistake in the name of an issue type.

What should you do before correcting the name of the issue type?

- A. Warn users that dashboard gadgets that refer to the issue type in their configuration will need to be updated with the corrected name.
- B. Warn users that saved filters using the issue type will not be able to find the issue type after the change.
- C. Update the issue type schemes to refer to the new name.
- D. Update the workflow schemes for the issue type to use the new name.

Correct Answer: C

QUESTION 2

A team is complaining that their Jira project is slow to use. You are able to replicate the slow behavior by viewing and trying to edit one of their issues.

Which logging option will help you or a system administrator to diagnose the problem?

- A. Use the Log Analyzer to get more information about the issue view process.
- B. Configure Jira to record and log the JavaScript execution from the browser console.
- C. Set the logging to DEBUG level on all packages causing activity for that issue.
- D. Enable profiling globally, so the logs can be inspected for anomalies when viewing the issue.

Correct Answer: D

QUESTION 3

Managers want to ensure that every issue in Jira always has an assignee. Which change will definitely meet this requirement?

- A. Update post functions to set the assignee appropriately at each workflow transition.
- B. Set Default Assignee to Project Lead in every project.
- C. Use components for automatic assignment in every project.
- D. Make the assignee required on workflow transition screens.

E. Make the assignee required through field configurations.

F. Set the global option "Allow unassigned issues" to OFF.

Correct Answer: A

QUESTION 4

A project has hundreds of old completed issues which are cluttering up the reports, searches, and dashboards.

The project administrator has the following requirements:

1.

He wants to hide the old issues.

2.

He wants to unhide issues, if needed.

3.

He wants to control whether he himself sees the hidden issues, so they do not clutter his own daily work. Which three configurations, when combined, will meet these requirements? (Choose three.)

A. security level

B. project permission

C. workflow condition

D. project role

E. global permission

F. group

Correct Answer: BDF

QUESTION 5

You have been asked to take on the administration of a second Jira installation in your company.

You were given the following information about user accounts:

The company standard is to use Active Directory (AD) to provide user accounts.

There are several Active Directory systems in use by different business units.

The second Jira is not to be merged with your main Jira.

The main Jira system is connected to Active Directory for user accounts.

The second Jira is using internal user accounts, not Active Directory.

People using the second Jira are using the same login ID as they would use in Active Directory.

Your company would like to use Single Sign-on (SSO) but has not yet implemented it for either Jira system.

Which authentication method should you recommend?

- A. Change the new Jira to use your main Jira's directory services, as that is already reading your Active Directory services.
- B. Set up a Crowd server to get the user lists from all internal directories and AD, and use AD directly for the password checking.
- C. Set up a Crowd server to pull in all the AD services, and plan to migrate internal users.
- D. Change the new Jira to link directly to the required AD servers.

Correct Answer: B
