QUESTION 1

RDS provides whitelist access policies. You can set permitted IP addresses and IP network segments to effectively prevent hackers from attacking the server by port scanning.

- A. True
- B. False

Correct Answer: A

QUESTION 2

When you create an Alibaba Cloud VPC, a VRouter and a route table will be created automatically. Which of the following statements is NOT correct about the route table?

- A. Each VRouter may have multiple route tables.
- B. When a VPC is deleted, the corresponding route table is also deleted.
- C. This route table cannot be deleted
- D. The routing entries of the route table can not be modified manually.

Correct Answer: B

QUESTION 3

Alibaba Cloud SLB can distribute user requests to backend ECS instances. These ECS instances must have the same specification (CPU, Memory)

- A. True
- B. False

Correct Answer: A

QUESTION 4

RDS accounts can be used to connect with the databases created on a given RDS instance. Each account can be bound with multiple databases. Yet, the read/write permissions of each database can only be assigned to one RDS account

- A. True
- B. False

Correct Answer: A

QUESTION 5

The difference between public and private Server Load Balancers (SLBs) is that private SLBs connect to their backend ECS instances using the private network (Intranet) while public SLBs connect to their backend ECS instances using the public network (Internet).

A. True

B. False

Correct Answer: B
