### QUESTION 1

After activating an Alibaba Cloud Elastic Compute Service (ECS) instance, you want to monitor the status of the ECS instance via Alibaba Cloud console. Therefore: you must activate and purchase Alibaba Cloud CloudMonitor service to meet this demand.

- A. True
- B. False

Correct Answer: B

---

### QUESTION 2

Before data communication is setup, the security groups match the security group rules one by one to query whether to allow access requests Assume that the user has created two security group rules 1 and 2 The protocol type, port range, authorization type, and authorization object of the two security group rules are the same. The difference is that Rule 1 is a denial policy, rule 2 is an allowed policy, so the following statement is correct\_\_\_\_\_ (Number of correct answers 2)

- A. If rule 1 and rule 2 have the same priority, the rule of the denial policy takes effect first, and the rule of the allowed policy does not take effect
- B. If rule 1 and rule 2 have the same priority, the rule of the allowed policy takes effect first, and the rule that of the denial policy does not take effect.
- C. If rule 1 and rule 2 have different priorities, the rule with a small priority number takes effect
- D. If rule 1 and rule 2 have different priorities, the rule with a large priority number takes effect.

Correct Answer: AC

---

### QUESTION 3

Alibaba Cloud Server Load Balancer (SLB) provides services for distributing traffic among multiple ECS instances SLB can expand the application system's service capacity through traffic distribution, and improve the system's availability by eliminating SPoFs (Single Points of Failure). Which of the following statements are correct? (Number of correct answers; 2)

- A. One of SLB's features is the Health Check. If some of the backend ECS instances are down, whereas other backend ECS instances can still provide services, then the system can continue to work normally.
- B. When recreating an SLB instance that has an Internet IP address, a new Internet IP address will be assigned to the SLB instance.
- C. Before using SLB to provide external services, make sure that you have installed and correctly configured the SLB agent on all of the backend ECS instances.
- D. SLB provides a function to automatically synchronize data among backend ECS instances using rsync remote synchronization.

Correct Answer: AD

---

#### QUESTION 4

Alibaba Cloud Elastic Compute Service (ECS) instances in different Security Groups will definitely have no way to communicate with each other.

- A. True
- B. False

Correct Answer: A

---

#### QUESTION 5

The daily PV volume of a community website is as high as 20 million. The applications of the website are deployed on ECS instances while logs are stored on the data disks of a single ECS instance.

Now, the website wants to extend the log retention period to 24 months and ensure that logs can be quickly downloaded when needed. The current data disks they have can only help retain three months of logs. In this case, \_\_\_\_\_ is the ideal solution for solving the log retention issue.

- A. CDN
- B. Container Service
- C. OSS
- D. ApsaraDB for RDS

Correct Answer: A
