QUESTION 1

Clean bandwidth refers to the maximum normal clean bandwidth that can be processed by Anti-DDoS Premium instances when your business is not under attack. Make sure that the Clean bandwidth of the instance is greater than the peak value of the inbound or outbound traffic of all services connected to the Anti-DDoS Premium instances

If the actual traffic volume exceeds the maximum Clean bandwidth, your business may be subject to traffic restrictions or random packet losses, and your normal business may be unavailable, slowed, or delayed for a certain period of time

A. True

B. False

Correct Answer: A

QUESTION 2

Alibaba Cloud's CloudMonitor can not only monitor ECS instances in a secure and efficient way, but also monitor HTTP sites of clients' servers in data centers. However, in the latter case, Alibaba Cloud does not provide monitor agent so users need to develop their own scripts to collect data.

A. True

B. False

Correct Answer: B

QUESTION 3

Users can detach the Security Center client on Alibaba Cloud ECS instances, and reinstall it later when necessary.

A. True

B. False

Correct Answer: A

QUESTION 4
