QUESTION 1

Anti-DDoS Premium Service is a value-added service intended to address the problem of service

interruption caused by DDoS attack to servers including non-Alibaba Cloud hosts)

Users can configure a protected IP address so that the attack traffic can be redirected to this IP address,

thereby ensuring the stability and reliability of the origin site. When a user configures Anti-DDoS Premium

Service and imports an HTTPS certificate, the system prompts an "incorrect parameter format" error.

Which of the following is NOT the reason of this error?

A. The certificate contains strings like "---"

B. The name of the certificate contains invalid letters

C. The certificate contains nonstandard content

D. The name of the certificate is too long to be accepted

Correct Answer: C

QUESTION 2

Alibaba Cloud Anti-DDoS Premium Service can be used to protect against DDoS attacks larger than 100 Gbps. It can be used to protect both Alibaba Cloud hosts and non-Alibaba Cloud hosts.

A. True

B. False

Correct Answer: A

QUESTION 3
