QUESTION 1

You have helped a customer set up a content filtering solution based on Content Moderation service. However, the customer is complaining that certain images are getting incorrectly flagged as pornographic content. What can you do to help fix this?

- A. Create an "Image Library" from the Content Moderation console and add the images to the Image Library's whitelist
- B. Ask your customer to use different images on their site
- C. Modify the images until Content Moderation service starts marking them as pornographic.
- D. Open a ticket with Alibaba Cloud support, and send them a copy of the images, so that they can tune Content Moderation's detection algorithms

Correct Answer: A

QUESTION 2

Alibaba Cloud Anti-DDoS Premium can be used only when the origin site IP address is in Alibaba Cloud.

- A. True
- B. False

Correct Answer: B

QUESTION 3

When a Layer-4 forwarding rule is configured with multiple origin site IP addresses, Alibaba Cloud Anti-DDoS Premium Service will perform load balancing for Layer-4 requests using balancing algorithm.

- A. True
- B. False

Correct Answer: A

QUESTION 4

There is a limit on the number of Customer Master Keys (CMKs) that users can create using Key Management Service (KMS), but users can raise this limit by submitting a support ticket to Alibaba Cloud.

- A. True
- B. False

Correct Answer: A

QUESTION 5

Content Moderation Service is an API-based service Like many API services, it employs throttling to make sure that the service cannot be overwhelmed by a large number of simultaneous requests. What is the maximum number of requests per minute you can make against the Content Moderation API?

- A. 300
- B. 100
- C. 1000
- D. 600

Correct Answer: D
