QUESTION 1

Alibaba Cloud Security's Data Risk Control can effectively resolve junk registration, database hacking, and other service risk identification problems. To use this service, you need to first collect service data. Which of the following methods can be used to collect information off Web application systems?

- A. JavaScript
- B. SDK
- C. JavaScript, SDK
- D. HTML5

Correct Answer: A

QUESTION 2

As your business grows, you begin exceeding the maximum number of requests-per-minute supported by the Content Moderation API and requests begin to fail.

What is the best way to resolve this issue?

- A. Build a custom message queue solution which you can use to buffer requests and spread them out over time
- B. Open a ticket and ask for the API request limits to be raised
- C. There is nothing you can do to resolve this problem, except to make fewer requests.
- D. Open a second Alibaba Cloud account, buy Content Moderation service under that account, and split your requests between these two accounts.

Correct Answer: B

QUESTION 3

In a public cloud environment Alibaba Cloud is responsible for security of cloud computing infrastructure (such as the IDC environment, physical server OandM, and virtualization layer of cloud products). However, you still need to perform necessary security optimization measures for the Cloud products you purchased. Which of the following actions do you think are safe?

- A. To reduce the communication cost, five administrators of the company use the root account to log on to the ECS instance.
- B. After buying an ECS instance, enable the security group firewall for the ECS instance through the console, and only allow a management IP address to remotely log on to the ECS instance.
- C. For easy management, change the administrator password for the ECS instance to 123456.
- D. To enable colleagues working at home to update data, open public IP addresses for ApsaraDB for RDS instances,

and allow all IP addresses to connect to the instances

Correct Answer: B

QUESTION 4

To improve system security and protect the system from DDoS attacks, you can use Alibaba Cloud Anti-DDoS Premium Service. Which of the following products can be used together with Alibaba Cloud Anti-DDoS Service to improve the system access capabilities? (Number of correct answers 3)

- A. Server Load Balancer
- B. CDN
- C. WAF
- D. RDS

Correct Answer: ABC

QUESTION 5

More than one CNAME record is generated for the same domain name when Alibaba Cloud Anti-DDoS Premium Service Instance is purchased for load balancing purpose.

- A. True
- B. False

Correct Answer: B
