QUESTION 1

How can we modify what data is shown in each row of the Alfresco Share document library, using the supported extension points?

A. Define and use a new metadata template in share-config-custom.xml

B. Customize the FreeMarket template that is used to render the document library

C. Update the JavaScript used to create the document library using the YUI libraries.

D. Clone all the document library components, and make the required changes.

Correct Answer: C

QUESTION 2

What happens to the original content item after a content transformation is performed?

A. It depends on how the transformation was configured.

B. It is replaced by the transformed content item.

C. It is versioned and updated.

D. It remains untouched.

Correct Answer: A

References: http://docs.alfresco.com/5.2/references/dev-extension-points-content-transformer.html

QUESTION 3

What is the default value of the element of a web script descriptor, if one is not specified?

A. None.

B. None for GET Web Scripts, "required" for POST/PUT.
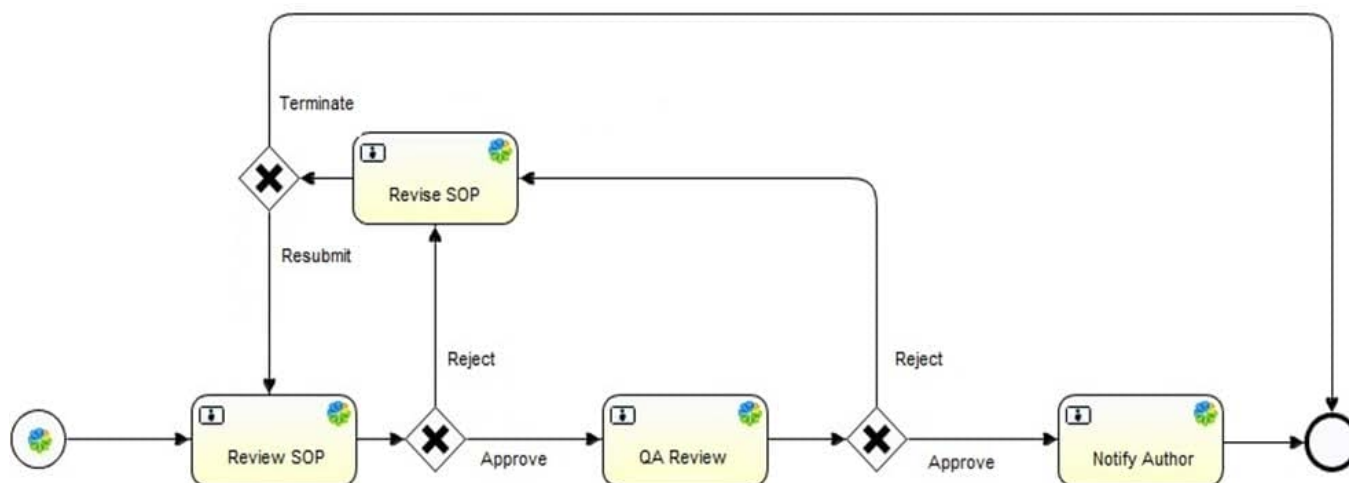

C. Required.

D. Depends on the value of

Correct Answer: A

None specifies that no transaction is required to run the web script. This is the default value if the transaction level is not explicitly specified, and the authentication level is none. If the authentication level is not none then the default value is required.

QUESTION 4
