QUESTION 1

A customer's article search page queries using a XPath expression from a very large number of article pages on AEM. The page takes a long time to respond regardless of the number of results.

What is causing this issue?

- A. XPath expression based queries
- B. Dispatcher cache is not properly configured
- C. Rendering logic is not optimized for large results
- D. Indexing is not configured

Correct Answer: D

QUESTION 2

What should an Architect recommend to lower website response times for international audiences?

- A. Enable TTL-based caching on Dispatcher
- B. Enable TTL-based caching on HTTP proxy
- C. Enable TTL-based caching on CDN
- D. Enable TTL-based caching on Publisher

Correct Answer: C

QUESTION 3

A large retail customer is building their ecommerce platform on AEM.

Several third-party vendors sell products through their site.

Those vendors need to review and verify the content close to production before the content goes live and the customer wants to provide them a restricted environment.

Which approach should the Architect recommend?

- A. Add a Publish (preview) Server and provide access
- B. Give third-party vendors access to the Author Server
- C. Use the Preview Capabilities of AEM Author Server
- D. Export content as PDF and share with the vendors

Correct Answer: C

QUESTION 4

A customer's implementation leverages Content Services. The JSON response is not accessible via the dispatcher. Which two configurations should the Architect verify? (Choose two.)

- A. Modify ACLs through User Management
- B. Modify URL re-write rules on the dispatcher
- C. Allow JSON content type headers in dispatcher configuration
- D. Allow JSON extension in dispatcher configuration
- E. Modify Allow/Deny rules on the dispatcher

Correct Answer: DE

QUESTION 5

A client needs to roll back published pages to a previous version in instances where content errors were uncovered. Previous versions of every published page should be made available for the authors to roll back if needed.

Which solution should an Architect recommend?

- A. Create editable template to autosave page versioning
- B. Modify the Page Activation workflow to include a versioning step
- C. Restore individual page versions from the AEM backup file
- D. Update the dispatcher.any file to force versioning of all pages

Correct Answer: B
