A. Static template

B. Content fragment

C. Experience fragment

D. Custom component

QUESTION 3

In an AEM as a Cloud Service environment, which repository areas are considered as immutable?

A. /content and /libs

B. /content and /etc

C. /apps and /libs

D. /apps and /content

Correct Answer: C

Explanation: In AEM as a Cloud Service environment, the repository areas /apps and /libs are considered as immutable, meaning that they cannot be modified at runtime by any means. These areas contain application code and configuration

that are deployed via Cloud Manager and are read-only for security and performance reasons. Any changes to these areas require a new deployment via Cloud Manager.

D. 1. Add a Synonym filter to the current indexes

A Synonym filter can help to map different terms that have the same meaning, such as "cat" and "feline". A LowerCase filter can help to normalize the case of the terms, so that "cats and dogs" and "Cats and Dogs" are treated the same. Reference: 1 Lucene Analyzers section
