QUESTION 3

A Campaign developer wants to allow users to pick values from a drop-down list within a form and allow users to enter values that may not be in the drop-down list.

How should the Campaign developer meet this requirement using enumeration?

A. Create a user enumeration that specifies open as the type

B. Create an enumeration within the input form definition

C. Create a user enumeration that specifies system as the type

D. Create an enumeration within the schema definition using the type="userDef" syntax

Correct Answer: B

QUESTION 4

A-Bar Enterprise; has a marketing workflow which incorporates Push notifications. User IDs are now changing to the hashed values of the previously used ID. Each recipient already has this unique hashed value stored in a field in the Recipient table.

Mobile app subscriptions are still registering correctly in Adobe Campaign, but the workflow no longer knows which recipient is linked to each User ID. Assuming everything outside of Adobe Campaign has been configured correctly, what must the developer do to regime tending Push notification?

A. Extend the Subscriber Applications schema, linking the hashed customer ID in the Recipient schema.

B. Reconfigure the External Account to update how each mobile user is Identified as a recipient now using the hashed customer ID as the identifier.

C. Decommission the previously set-up mobile application configuration in Adobe Campaign, and create a new one with the new integration key.

D. Update the mobile application configuration in Adobe Campaign with the new integration key.

Correct Answer: C

QUESTION 5

A client has a user created specifically for making API calls. The client does NOT want to create a new session token for each call.

How should the Campaign developer configure the operator to accomplish this request?

A. Enable trusted IP

B. Forbid web access

C. Use LDAP integration

D. Use Adobe ID login

Correct Answer: B
