### QUESTION 1

A custom module needs to log all calls of `\Magento\Customer\Api\AddressRepositoryInterface::save()`.

Which mechanism do you use?

- A. An observer on the `customer_address_repository_save` event, which is automatically fired for every repository save
- B. A proxy configured to intercept all calls to any public method and log them
- C. An extension attribute configured in the `extension_attributes.xml`
- D. A plugin declared for the `save()` method

Correct Answer: D

---

### QUESTION 2

How do you instruct Magento to enable a new module?

- A. `bin/magento module:enable MyCompany_MyModule`
- B. Magento automatically enables all new modules.
- C. Go to Admin > System > Module Management.
- D. Add `MyCompany_MyModule` to the `setup_module` table.

Correct Answer: A

---

### QUESTION 3

You are debugging a problem resulting from a recently deployed around plugin. The plugin is intercepting the `doSomething` method. The `aroundDoSomething` plugin method is called successfully, but the original `doSomething` method is no longer being executed as expected.

What is causing this?

- A. The sort order of the plugin is too high and supersedes the priority of the intercepted method
- B. The plugin implementation returned something other than its callable argument
- C. The plugin implementation is skipping the execution of its callable argument
- D. The plugin implementation overlooked using the `AbstractPlugin` parent class

Correct Answer: C

---

### QUESTION 4

What is a valid use case for an around plugin?

- A. The execution of the pluginized method must be suppressed
- B. The arguments of the before plugins must be modified
- C. The arguments of the after plugins must be modified
- D. The execution of the before and after plugins must be suppressed

Correct Answer: D

---

#### QUESTION 5

You are reviewing a theme in `app/design/frontend/MyCompany/MyTheme` and see the file `etc/view.xml`.

What is the function of this file?

- A. It configures Grunt to compile assets for the theme
- B. It stores theme and image configuration values
- C. It specifies the applicable CSS files for the theme
- D. It informs Magento that the theme is present and available for use

Correct Answer: B
