### QUESTION 1

What is the correct sequence of a four-stroke cycle gas engine?

- A. intake stroke, compression stroke, power stroke, exhaust stroke
- B. compression stroke, intake stroke, exhaust stroke, power stroke
- C. intake stroke, power stroke, compression stroke, exhaust stroke
- D. power stroke, compression stroke, intake stroke, exhaust stroke

Correct Answer: A

The correct sequence is intake stroke, compression stroke, power stroke and exhaust stroke.

---

### QUESTION 2

A four-wheel vehicle driving on all four wheels is known as a \_\_\_\_\_.

- A. 4 × 2
- B. 2 × 4
- C. 4 × 4
- D. 4 × 6

Correct Answer: C

A four-wheel vehicle is called a 4 × 4 if all wheels are driven.

One with six wheels with all six being driven is called a 6 × 6, and one with six wheels (like a truck) but only four being driven is designated as a 4 × 6.

---

### QUESTION 3

Uncontrolled, rapid drying of wood (for instance, lumber) causes \_\_\_\_\_.

- A. warping
- B. harmless discoloration, unless it's green, which indicates rot
- C. checking and cracking
- D. an increase in wood strength

Correct Answer: C

Uncontrolled, rapid drying of wood (for instance, lumber) causes checking and cracking. This is why new lumber

---

sometimes is kept submerged in water until it's time for it to be cut.

---

#### QUESTION 4

Which system on an automobile uses shock absorbers?

- A. the braking system
- B. the exhaust system
- C. the electrical system
- D. the suspension system

Correct Answer: D

The shock absorbers are the components in the suspension that dampen the vibrations in the system.

---

#### QUESTION 5

The purpose of the oil pump is to \_\_\_\_\_.

- A. allow excess or dirty gas to be pumped out of the gas tank
- B. lubricate the wheels to ensure they keep on rotating
- C. reserve oil for the car to run in case the gas tank becomes empty
- D. provide lubrication and prevent friction between metal parts of the engine

Correct Answer: D
