### QUESTION 1

When atoms and molecules pass thermal energy by direct contact, it is known as \_\_\_\_\_.

- A. conduction
- B. convection
- C. insulation
- D. swapping paint

Correct Answer: A

Explanation:

When atoms and molecules pass thermal energy by direct contact, it is known as conduction.

Convection is a current in a fluid (such as the atmosphere or ocean) caused by uneven distribution of heat.

Insulation is a substance or property that tends to keep heat (or lack of it) in a certain place, rather than passing it on.

Swapping paint is what race cars do when they bump or scrape against each other during a race.

---

### QUESTION 2

Which of the following is not one of the 6 basic animal groups?

- A. Birds
- B. Mammals
- C. Humans
- D. Invertebrates

Correct Answer: C

Explanation:

The six basic animal groups are birds, mammals, invertebrates, fishes, reptiles, and amphibians.

---

### QUESTION 3

Which color of visible light has the lowest frequency?

- A. yellow

- B. red
- C. indigo
- D. violet

Correct Answer: B

---

#### QUESTION 4

The member of the solar system with the shortest period of solar revolution is a \_\_\_\_\_.

- A. planetary satellite
- B. asteroid
- C. planet
- D. comet

Correct Answer: C

Explanation: The planet Mercury orbits the sun in 88 days.

---

#### QUESTION 5

A gamete is a cell that \_\_\_\_\_.

- A. fuses with a zygote during fertilization
- B. provides nutritional support to a developing fetus
- C. fuses with another gamete during fertilization
- D. fuses with a spermatid before fertilization

Correct Answer: C

Explanation:

A gamete is a cell that fuses with another gamete during fertilization.
