**QUESTION 1**

Genetics is a branch of science dealing with heredity. The field is concerned with how genes operate and the way genes are transmitted to offspring. Subdivisions in the field include cytogenetics, which is the study of the cellular basis of inheritance; microbial genetics, the study of inheritance in microbes; molecular genetics, the study of the biochemical foundation of inheritance; and human genetics, the study of how people inherit traits that are medically and socially important. Genetic counselors are primarily concerned with human genetics. They advise couples and families on the chances of their offspring having specific genetic defects.

According to the passage above, it's reasonable to assume that genetic counseling _____.

- A. is restricted to the very rich
- B. is used to diagnose diseases
- C. can be used by parents to learn if their offspring are likely to inherit a disease one of the parents has
- D. can be used by parents to prevent their offspring from inheriting a specific genetic defect

Correct Answer: C

Explanation:

Nothing in the passage supports Choices "is restricted to the very rich", "is used to diagnose diseases", or "can be used by parents to prevent their offspring from inheriting a specific genetic defect."

QUESTION 2

Buddhism is a religion that must be viewed from many angles. Its original form, as preached by Gautama in India and developed in the early years succeeding and as embodied in the sacred literature of early Buddhism, isn't representative of the actual Buddhism of any land today.

According to this passage, _____.

- A. most Buddhists live in India
- B. Buddhist teachings have changed over the years
- C. Buddhism draws its teachings from early Christianity
- D. Buddhist temples can be found in any land of the world

Correct Answer: B

Explanation:

The only statement that's supported by the passage is Choice "Buddhist teachings have changed over the years."

In fact, this sentence is the primary theme of the passage.

The other choices aren't supported by information contained in the paragraph.

QUESTION 3

Conan Doyle's Sherlock Holmes saga has enjoyed – or in some cases suffered – countless reinventions since its original publication from 1887 to 1927. The BBC's current television version starring Benedict Cumberbatch is perhaps one of the most successful, not least as its scriptwriters combine a deep knowledge of the original with a flair for departing wittily from it: the show's strategy of allusion, transformation, and up-to-dateness gives it both freshness and familiarity. The new series begins with "The Empty Hearse", its title alluding playfully to Conan Doyle's 1903 story "The Empty House" in which Holmes returns from apparent death at the hands of Professor Moriarty in Switzerland.

The word *flair*, as used in the above passage, most nearly means _____.

- A. dash
- B. aptitude
- C. style
- D. poise

Correct Answer: B

QUESTION 4

In the military, as in all professions, the issue of competence is directly relevant to professional integrity. Because human life, national security, and expenditures from the national treasury are so frequently at issue when the military acts, the obligation to be competent isn't merely prudential. That obligation is a moral one, and culpable incompetence here is clearly a violation of professional integrity. Part of the social aspect of professional integrity involves the joint responsibility for conduct and competence shared by all members of the profession. Only fellow professionals are capable of evaluating competence in some instances; hence, fellow professionals must accept the responsibility of upholding the standards of the profession. Fellow military members can spot derelictions of duty, failures of leadership, failures of competence, and the venalities of conduct that interfere with the goals of the military mission. Often, the obligations of professional integrity may be pitted against personal loyalties or friendships; and, where the stakes for society are so high, professional integrity should win out.

The author of the above passage would agree that _____.

- A. friendship must often take a back seat to professional integrity
- B. only fellow professionals should evaluate competence
- C. professional competence is a direct result of effective training programs
- D. all of the above

Correct Answer: A

Explanation:

The author specifically states that when pitted against friendship, professional integrity must often win out.

The author explains that only fellow professionals can evaluate other professionals in some (not all) cases, making Choice "only fellow professionals should evaluate competence" incorrect.

Choice "professional competence is a direct result of effective training programs" isn't supported by information in the passage.

QUESTION 5

Using functional magnetic resonance imaging (fMRI), researchers have identified abnormalities in the brains of children with attention deficit/hyperactivity disorder (ADHD) that may serve as a biomarker for the disorder, according to a study presented November 28 at the annual meeting of the Radiological Society of North America (RSNA). ADHD is one of the most common childhood disorders, affecting an estimated five to eight percent of school-aged children. Symptoms, which may continue into adulthood, include inattention, hyperactivity and impulsivity behaviors that are out of the normal range for a child's age and development.

What is the best title for this passage?

- A. "ADHD Occurrence in Children is Between 5% and 8%"
- B. "MRIs Aid in Earlier ADHD Diagnosis"
- C. "Brain Differences Found in Children with ADHD"
- D. "ADHD Kids Exhibit Abnormal Behavior"

Correct Answer: C
