QUESTION 1

Which of the following comments would be the MOST important one you would make? [K3] 2 credits

- A. Description of flow is not detailed enough
- B. Specific characteristics of actor(s) are missing
- C. No usability acceptance criteria
- D. User tasks not defined

Correct Answer: B

QUESTION 2

Ken, an entrepreneur in Leeds finds the quality of the tea locally available so low, that he decides to research superior teas around the world. He decides to market, sell and distribute these superior teas via the web. His market strategy is to offer superior products on a well-designed website with graphics that are fast to load, has high availability, superior usability and fast response times. The website will offer the following: -An innovative interactive catalogue of teas, which not only enables customers to buy the product, but also enables them to provide feedback by rating the teas (which will influence his stock purchasing levels) Provide the customer with the ability to use secure credit card transactions Provide the customer to give general feedback Ken selects an iterative model for the development of the prototypes. The team consists of three developers that are experienced in web development. Ken, although he doesn't have technical skillset, is concerned with quality. He doesn't believe a lot of documentation is necessary and he wants the website to be completed quickly. The test basis contains the following: -Story boards that show the information flow and page links through the site -HTML pages developed to date. -A statement of non-functional requirements. With the strategy taking shape, Ken asks your advice on the specific testing techniques that should be used to complete the required testing, bearing in mind the nature of the application and the nature of Ken's overall objectives. Which of the following represents the best choice of testing techniques in this scenario? [K4] 3 credits

- A. Equivalence partitioning and boundary value analysis using the storyboard ideas as a basis to maximize functional coverage.
- B. Decision testing to ensure that there is no redundant code
- C. Exploratory testing to maximize the value of the team's experience
- D. State transition testing to test the web site's availability statuses

Correct Answer: C

QUESTION 3

Apart from state transition testing, which other specification-based technique would you additionally choose to test the interfaces between components of "Route Calculation" and thus typically find different types of defects? Identify the MOST likely technique from the following list. [K4] 3 credits

- A. Equivalence Partitioning
- B. Use Case Testing

C. Orthogonal Arrays

D. Decision Testing

Correct Answer: A

QUESTION 4

You are working as a tester on a project to develop a point-of-sales system for grocery stores. Which of the following is a product risk that could be identified for such a system? [K3] 2 credits

- A. The arrival of a more reliable competing product on the market
- B. Delivery of an incomplete test release to the first cycle of system test
- C. An excessively high number of defect fixes fail during re-testing
- D. Failure to accept allowed credit cards

Correct Answer: D

QUESTION 5

A company wants to develop a web site to implement an on-line sales channel. The company has decided to do some usability testing, but resources are limited. The usability testing has therefore to be done as efficient as possible.

Which THREE techniques would you recommend? [K4] 3 credits, 2 out of 3 correct 1 credit A. SUMI

- B. Usability laboratory
- C. Use case testing
- D. Heuristic evaluation
- E. Equivalence partitioning
- F. Pairwise testing
- G. Exploratory testing

Correct Answer: ACD
