QUESTION 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has 100 users located in an office in Paris.

The on-premises network contains the servers shown in the following table.

Name	Operating system	Configuration
Server1	Windows Server 2012 R2	Microsoft Exchange Server 2016
Server2	Windows Server 2016	Microsoft SQL Server 2016
Server3	Windows Server 2016	Domain controller
Server4	Red Hat Enterprise Linux 7.5	File server

You create a new subscription. You need to move all the servers to Azure. Solution: You run azcopy.exe.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 2

HOTSPOT

You need to configure the Device settings to meet the technical requirements and the user requirements.

Which two settings should you modify? To answer, select the appropriate settings in the answer area.

Hot Area:

Answer Area

Save Discard

Users may join devices to Azure AD ⓘ All Selected None

Selected
No member selected

Additional local administrators on Azure AD joined devices ⓘ Selected None

Selected
No member selected

Users may register their devices with Azure AD ⓘ All None

Require Multi-Factor Auth to join devices ⓘ Yes No

Maximum number of devices per user ⓘ

Users may sync settings and app data across devices ⓘ All Selected None

Selected
No member selected

Correct Answer:

Answer Area

Save Discard

Users may join devices to Azure AD ⓘ All Selected None

Selected
No member selected

Additional local administrators on Azure AD joined devices ⓘ Selected None

Selected
No member selected

Users may register their devices with Azure AD ⓘ All None

Require Multi-Factor Auth to join devices ⓘ Yes No

Maximum number of devices per user ⓘ

Users may sync settings and app data across devices ⓘ All Selected None

Selected
No member selected

Explanation:

Box 1: Selected

Only selected users should be able to join devices

Box 2: Yes

Require Multi-Factor Auth to join devices.

From scenario:

Ensure that only users who are part of a group named Pilot can join devices to Azure AD

Ensure that when users join devices to Azure Active Directory (Azure AD), the users use a mobile phone to verify their identity.

QUESTION 3

DRAG DROP

You need to prepare the environment to ensure that the web administrators can deploy the web apps as quickly as possible.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

- From the Templates service, select the template, and then share the template to the web administrators.
- Create a resource group, and then deploy a web app to the resource group.
- From the Automation script blade of the resource group, click the **Parameters** tab.
- From the Automation script blade of the resource group, click **Deploy**.
- From the Automation Accounts service, add an automation account.
- From the Automation script blade of the resource group, click **Add to library**.

Answer Area

Correct Answer:

Actions

Create a resource group, and then deploy a web app to the resource group.

From the Automation script blade of the resource group, click the **Parameters** tab.

From the Automation script blade of the resource group, click **Add to library**.

Answer Area

From the Automation Accounts service, add an automation account.

From the Automation script blade of the resource group, click **Deploy**.

From the Templates service, select the template, and then share the template to the web administrators.

Explanation:

Step 1:

First you create a storage account using the Azure portal.

Step 2:

Select Automation options at the bottom of the screen. The portal shows the template on the Template tab.

Deploy: Deploy the Azure storage account to Azure.

Step 3:

Share the template.

Scenario: Web administrators will deploy Azure web apps for the marketing department. Each web app will be added to a separate resource group. The initial configuration of the web apps will be identical. The web administrators have permission to deploy web apps to resource groups. References: <https://docs.microsoft.com/en-us/azure/azure-resource-manager/resource-manager-quickstart-create-templates-use-the-portal>

QUESTION 4

HOTSPOT

You have an Azure subscription named Subscription1 that contains the resources in the following table.

Name	Type
VM1	Virtual machine
VM2	Virtual machine
LB1	Load balancer

A web server runs on VM1 and VM2.

When you request a webpage named Page1.htm from the Internet, LB1 balances the web requests to VM1 and VM2, and you receive a response.

On LB1, you have a rule named Rule1 as shown in the Rule1 exhibit. (Click the Exhibit tab.)

***Name**

*** IP Version**
 IPv4 IPv6

***Frontend IP address**
 ▾

Protocol
 TCP UDP

***Port**

***Backend port**

Backend pool
 ▾

Health probe
 ▾

Session persistence
 ▾

Idle timeout (minutes)

Floating IP (direct server return)
Disabled

You have a health probe named Probe1 as shown in the Probe1 exhibit. (Click the Exhibit tab.)

*Name
Probe1

* IP Version
IPv4

Protocol
 HTTP TCP

*Port
80

*Path
/Probe1.htm

*Interval
20
seconds

*Unhealthy threshold
2
consecutive failures

Used by
[Rule1](#)

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements

	Yes	No
If a user is served Page1.htm from VM1, and then the user refreshes the web browser, Page1.htm will be refreshed from VM1 always.	<input type="radio"/>	<input type="radio"/>
If you change the protocol of Rule1, all the web requests will fail.	<input type="radio"/>	<input type="radio"/>
If you delete Probe1.htm from VM2, LB1 will route all the web requests to VM1.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statements

	Yes	No
If a user is served Page1.htm from VM1, and then the user refreshes the web browser, Page1.htm will be refreshed from VM1 always.	<input type="radio"/>	<input checked="" type="radio"/>
If you change the protocol of Rule1, all the web requests will fail.	<input checked="" type="radio"/>	<input type="radio"/>
If you delete Probe1.htm from VM2, LB1 will route all the web requests to VM1.	<input checked="" type="radio"/>	<input type="radio"/>

QUESTION 5

You need to implement a backup solution for App1 after the application is moved. What should you create first?

- A. a recovery plan
- B. an Azure Backup Server
- C. a backup policy
- D. a Recovery Services vault

Correct Answer: D

A Recovery Services vault is a logical container that stores the backup data for each protected resource, such as Azure VMs. When the backup job for a protected resource runs, it creates a recovery point inside the Recovery Services vault.

Scenario:

There are three application tiers, each with five virtual machines.

Move all the virtual machines for App1 to Azure.

Ensure that all the virtual machines for App1 are protected by backups.
