QUESTION 1

DRAG DROP

You are configuring serverless computing in Azure.

You need to receive an email message whenever a resource is created in or deleted from a resource group.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Create an Azure Event Grid trigger

Create an Azure Service Bus namespace

Create conditions and actions

Create an Azure Logic App

Create an event subscription

Answer Area

Three empty boxes for the answer area.

Correct Answer:

Actions

Create an Azure Service Bus namespace

Create an event subscription

Answer Area

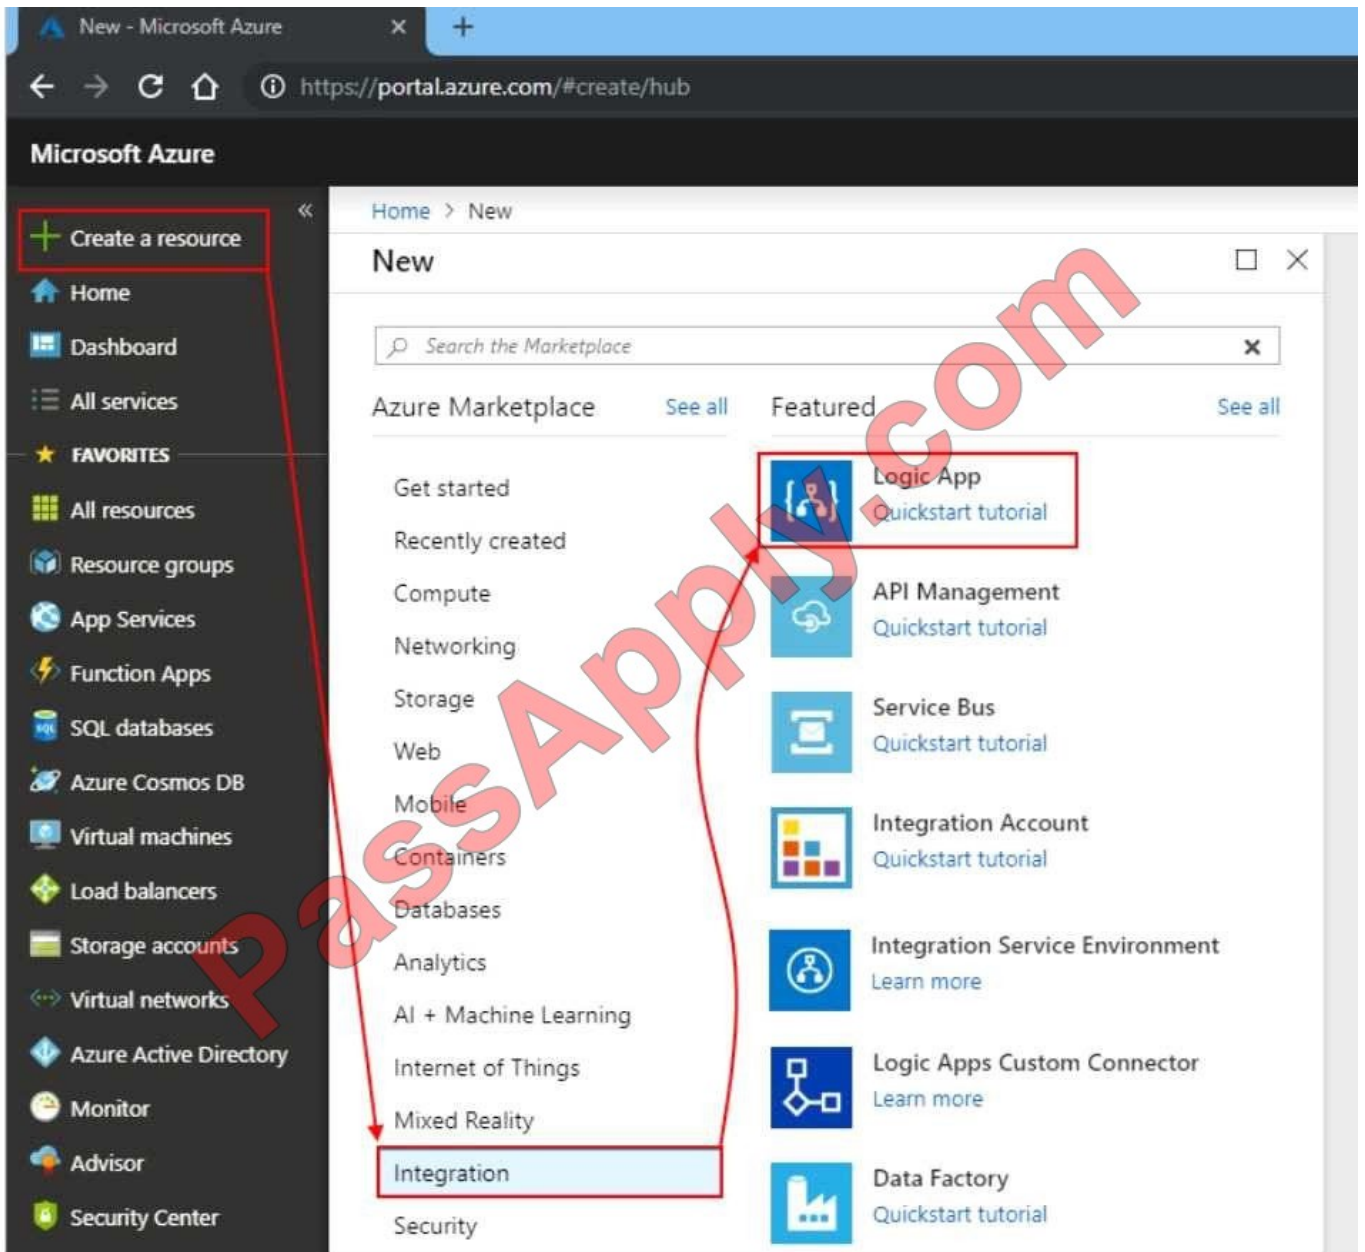

Create an Azure Logic App

Create an Azure Event Grid trigger

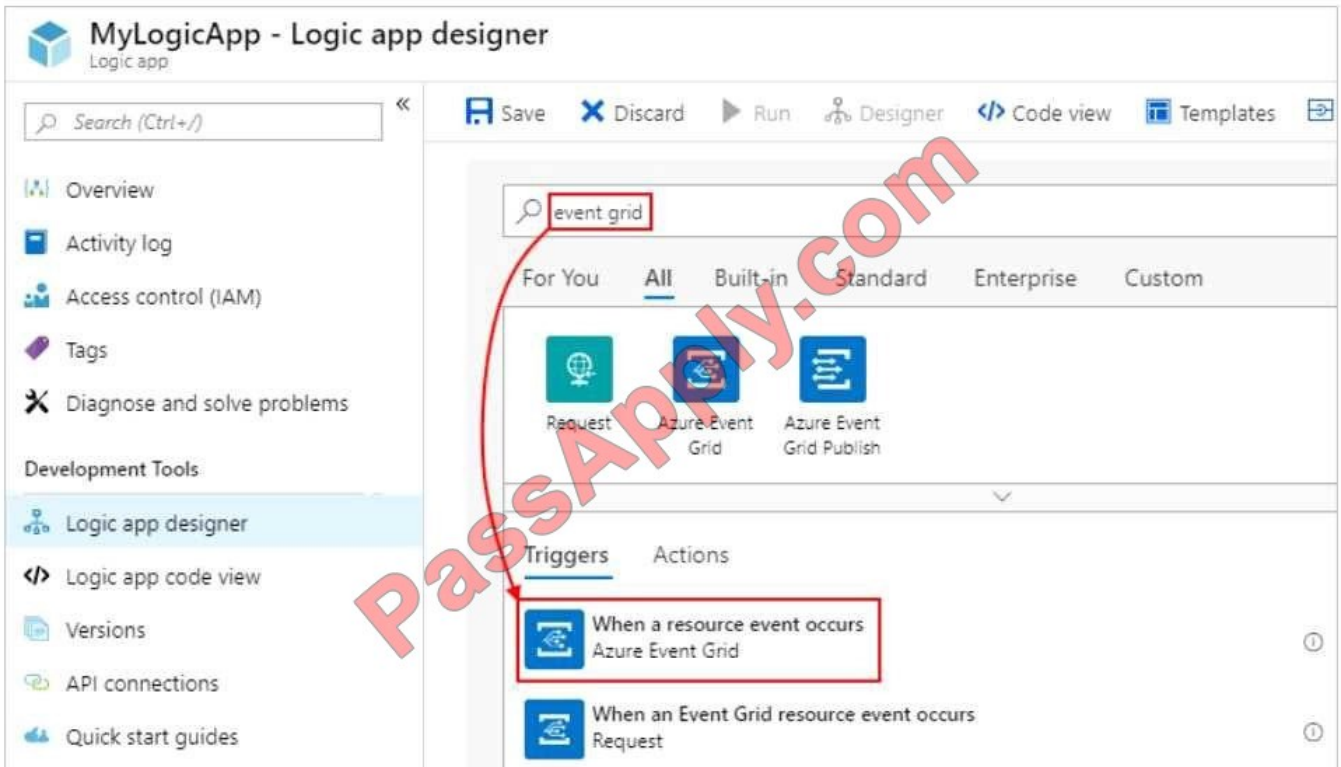

Create conditions and actions

References: <https://docs.microsoft.com/en-us/azure/event-grid/monitor-virtual-machine-changes-event-grid-logic-app>

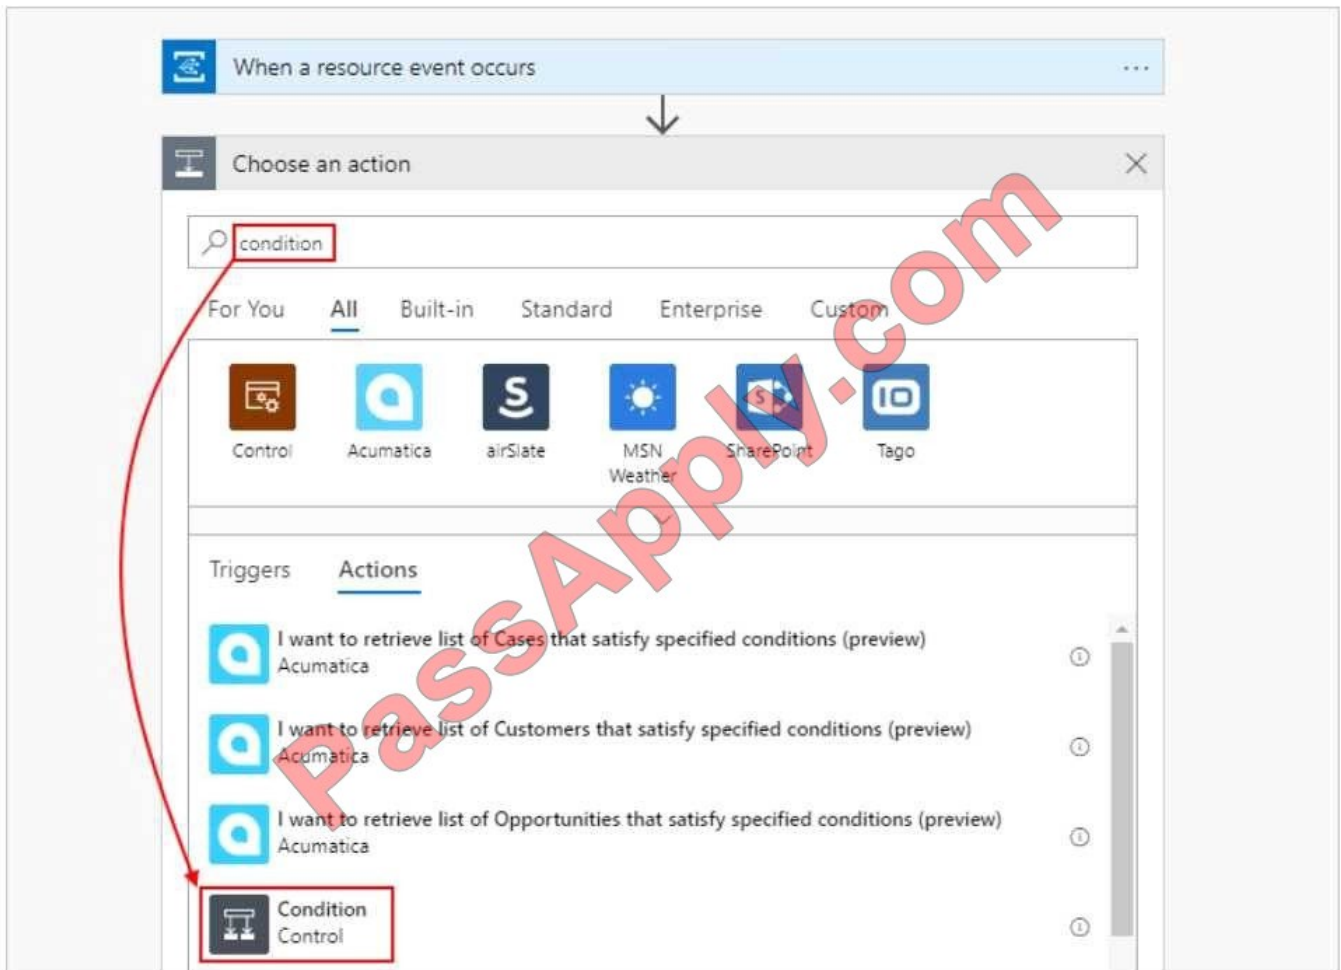

Action 1: Create an Azure Logic App

Action 2: Create an Azure Event Grid Trigger

Action 3: Create conditions and actions

References: <https://docs.microsoft.com/en-us/azure/event-grid/monitor-virtual-machine-changes-event-grid-logic-app>

QUESTION 2

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to ensure that an Azure Active Directory (Azure AD) user named Admin1 is assigned the required role to enable Traffic Analytics for an Azure subscription.

Solution: You assign the Network Contributor role at the subscription level to Admin1.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: A

Your account must meet one of the following to enable traffic analytics:

Your account must have any one of the following Azure roles at the subscription scope: owner, contributor, reader, or

network contributor.

Reference:

<https://docs.microsoft.com/en-us/azure/network-watcher/traffic-analytics-faq>

QUESTION 3

You have an on-premises server that contains a folder named D:\Folder1.

You need to copy the contents of D:\Folder1 to the public container in an Azure Storage account named contosodata.

Which command should you run?

- A. `https://contosodata.blob.core.windows.net/public`
- B. `azcopy sync D:\folder1 https://contosodata.blob.core.windows.net/public--snapshot`
- C. `azcopy copy D:\folder1 https://contosodata.blob.core.windows.net/public--recursive`
- D. `az storage blob copy start-batch D:\Folder1 https://contosodata.blob.core.windows.net/public`

Correct Answer: C

The `azcopy copy` command copies a directory (and all of the files in that directory) to a blob container. The result is a directory in the container by the same name. Incorrect Answers:

B: The `azcopy sync` command replicates the source location to the destination location. However, the file is skipped if the last modified time in the destination is more recent.

D: The `az storage blob copy start-batch` command copies multiple blobs to a blob container.

Reference: <https://docs.microsoft.com/en-us/azure/storage/common/storage-use-azcopy-blobs>
<https://docs.microsoft.com/en-us/azure/storage/common/storage-ref-azcopy-copy>

QUESTION 4

You have an Azure subscription that contains a user account named User1. You need to ensure that User1 can assign a policy to the tenant root management group. What should you do?

- A. Assign the Global administrator role to User1, and then instruct User1 to configure access management for Azure resources.
- B. Assign the Global administrator role to User1, and then modify the default conditional access policies.
- C. Assign the Owner role to User1. and then modify the default conditional access policies.
- D. Assign the Owner role to User1. and then instruct User1 to configure access management for Azure resources.

Correct Answer: B

QUESTION 5

You have an Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com that contains 100 user accounts.

You purchase 10 Azure AD Premium P2 licenses for the tenant.

You need to ensure that 10 users can use all the Azure AD Premium features.

What should you do?

- A. From the Groups blade of each user, invite the users to a group.
- B. From the Licenses blade of Azure AD, assign a license.
- C. From the Directory role blade of each user, modify the directory role.
- D. From the Azure AD domain, add an enterprise application.

Correct Answer: B

Many Azure Active Directory (Azure AD) services require you to license each of your users or groups (and associated members) for that service. Only users with active licenses will be able to access and use the licensed Azure AD services

for which that's true. Licenses are applied per tenant and do not transfer to other tenants.

Not all Microsoft services are available in all locations. Before a license can be assigned to a group, you must specify the Usage location for all members. You can set this value in the Azure Active Directory > Users > Profile > Settings area in

Azure AD. Any user whose usage location is not specified inherits the location of the Azure AD organization.

You can add the licensing rights to users or to an entire group. Check the reference link for the steps.
