everyone who sign in to the devices.

What should you do?

- A. Install the MSRDC by using msiexec.exe and the ALLUSERS=1 command line option.
- B. Install the MSRDC by using msiexec.exe and the ALLUSERS=2 command line option.

Correct Answer: A

Although your users can install the client directly after downloading it, if you\\re deploying to multiple devices, you may want to also deploy the client to them through other means. Deploying using group policies or the Microsoft Endpoint Configuration Manager lets you run the installer silently using a command line. Run the following commands to deploy the client per-device or per-user.

Per-device installation msiexec.exe /I /qn ALLUSERS=1

Incorrect: Per-user installation msiexec.exe /i `` /qn ALLUSERS=2 MSIINSTALLPERUSER=1
