QUESTION 1

Note: This question is a part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to deploy resources to host a stateless web app in an Azure subscription. The solution must meet the following requirements:

1.

Provide access to the full .NET framework.

2.

Provide redundancy if an Azure region fails.

3.

Grant administrators access to the operating system to install custom application dependencies.

Solution: You deploy a web app in an Isolated App Service plan.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

Instead, you should deploy an Azure virtual machine to two Azure regions, and you create a Traffic Manager profile.

QUESTION 2

Your network contains an on-premises Active Directory forest.

You discover that when users change jobs within your company, the membership of the user groups are not being updated. As a result, the users can access resources that are no longer relevant to their job.

You plan to integrate Active Directory and Azure Active Directory (Azure AD) by using Azure AD Connect.

You need to recommend a solution to ensure that group owners are emailed monthly about the group memberships they manage.

What should you include in the recommendation?

A. conditional access policies

- B. Tenant Restrictions
- C. Azure AD access reviews
- D. Azure AD Identity Protection

Correct Answer: C

Reference: <https://docs.microsoft.com/en-us/azure/active-directory/governance/access-reviews-overview>

QUESTION 3

HOTSPOT

You are reviewing the budget for Azure Storage as shown in the exhibit (Click the Exhibit tab.) All the virtual machines in the Azure subscription use Premium storage.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: correct selection is worth one point.

Hot Area:

Deallocating the virtual machines will [answer choice]

▼
have no impact on storage costs
increase storage costs
reduce storage costs

Shutting down the virtual machines will [answer choice]

▼
have no impact on storage costs
increase storage costs
reduce storage costs

Correct Answer:

Deallocating the virtual machines will [answer choice]

▼
have no impact on storage costs
increase storage costs
reduce storage costs

Shutting down the virtual machines will [answer choice]

▼
have no impact on storage costs
increase storage costs
reduce storage costs

QUESTION 4

You plan to move a web application named App1 from an on-premises data center to Azure.

App1 depends on a custom COM component that is installed on the host server.

You need to recommend a solution to host App1 in Azure. The solution must meet the following requirements:

1.

App1 must be available to users if an Azure data center becomes unavailable.

2.

Costs must be minimized.

What should you include in the recommendation?

- A. In two Azure regions, deploy a Traffic Manager profile and a web app.
- B. In two Azure regions, deploy a load balancer and a virtual machine scale set.
- C. Deploy a load balancer and a virtual machine scale set across two availability zones.
- D. In two Azure regions, deploy a load balancer and a web app.

Correct Answer: A

QUESTION 5

You need to recommend a solution to generate a monthly report of all the new Azure Resource Manager resource deployment in your subscription. What should you include in the recommendation?

- A. Azure Activity Log

- B. Azure Monitor action groups
- C. Azure Advisor
- D. Azure Monitor metrics

Correct Answer: A

Activity logs are kept for 90 days. You can query for any range of dates, as long as the starting date isn't more than 90 days in the past. Through activity logs, you can determine:

1.
what operations were taken on the resources in your subscription who started the operation
2.
when the operation occurred
3.
the status of the operation
4.
the values of other properties that might help you research the operation

Reference: <https://docs.microsoft.com/en-us/azure/azure-resource-manager/management/view-activity-logs>
