QUESTION 1

DRAG DROP

Your company is a Cloud Solution Provider (CSP).

You plan to create an Azure subscription for a new Azure Stack Hub integrated system and configure Azure Stack Hub to be available to multiple customers. Your company will also have its own workloads deployed to the Azure Stack Hub.

You need to perform the deployment so that usage data for future customers is directed to their Azure subscription.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Create a Pay-As-You-Go (PAYG) subscription.

Create an Azure Partner Shared Services (APSS) subscription.

Enable multitenant billing.

Associate the user subscriptions to a Digital Partner of Record (DPOR).

Register Azure Stack Hub.

Answer Area

Correct Answer:

Actions

Create a Pay-As-You-Go (PAYG) subscription.

Associate the user subscriptions to a Digital Partner of Record (DPOR).

Answer Area

Create an Azure Partner Shared Services (APSS) subscription.

Register Azure Stack Hub.

Enable multitenant billing.

QUESTION 2

You plan to install an update to an Azure Stack Hub integrated system.

You need to verify whether the integrated system is healthy, and whether you can apply the update. You must achieve the goal as quickly as possible.

Solution: From a privileged endpoint (PEP) session, you run

Test-AzureStack-Group "UpdateReadiness".

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

Reference:

<https://docs.microsoft.com/en-us/azure-stack/operator/azure-stack-diagnostic-test?view=azs-2008>

QUESTION 3

You need to change the int1 region to use the capacity model. The solution must meet the technical requirements.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Run the Remove-AzsRegistration cmdlet.

Notify all the users in the int1 region and schedule a maintenance window.

Run the Get-AzsRegistrationToken cmdlet.

Select the subscription that was used to perform the initial registration.

Run the Set-AzsRegistration cmdlet.

Answer area

⏪

⏩

⏪

⏩

Correct Answer:

Actions

Run the Remove-AzsRegistration cmdlet.

Run the Get-AzsRegistrationToken cmdlet.

Answer area

Notify all the users in the int1 region and schedule a maintenance window.

Select the subscription that was used to perform the initial registration.

⏪

⏩

Run the Set-AzsRegistration cmdlet.

⏪

⏩

Step 1: Notify all the users in the int1 region and schedule a maintenance window.

Step 2: Select the subscription that was used to perform the initial registration.

Note: You need to change the int1 region to use the capacity model.

Change the billing model and registration name of the int1 region.

The int1 region runs a high number of Windows virtual machines that use pay-as-you-use images.

Change billing model, how features are offered, or re-register your instance This section applies if you want to change the billing model, how features are offered, or you want to re-register your instance. For all of these cases, you call the

registration function to set the new values. You don't need to first remove the current registration.

select the subscription used during the registration

Select-AzSubscription -Subscription '\\'

rerun registration with new BillingModel (or same billing model in case of re-registration)

but using other parameters values from portal

Set-AzsRegistration -PrivilegedEndpointCredential \$YourCloudAdminCredential -

PrivilegedEndpoint \$YourPrivilegedEndpoint -BillingModel '\\'

RegistrationName '\\'-ResourceGroupName '\\'

Step 3: Run the Set-AzsRegistration cmdlet.

You can use Set-AzsRegistration to register Azure Stack Hub with Azure and enable or disable the offer of items in the marketplace and usage reporting.

To run the cmdlet, you need:

A global Azure subscription of any type.

To be signed in to Azure PowerShell with an account that's an owner or contributor to that subscription.

QUESTION 4

You need to create User2. The solution must support the planned changes. What should you use?

- A. the tenant portal
- B. Azure Stack Hub Administrator Resource Management Endpoint
- C. HLH
- D. ASZ-ERCS01

Correct Answer: A

Create a new cloudadmin user named User2.

Add a new Azure Stack Hub user account in Azure Active Directory (Azure AD)

Before you can test offers and plans and create resources, you'll need a user account for the Azure Stack Hub user portal. You create a user account in your Azure AD tenant, by using the Azure portal or PowerShell.

QUESTION 5

You have an Azure Stack Hub integrated system that uses the latest version.

You discover an alert for an external certificate that will expire. You obtain new certificates.

You need to validate that all the components required to change the certificates are in a healthy state, and then renew the certificates.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Run the Start-SecretRotation and specify the PfxFilePath parameter.
- B. Run Start-SecretRotation cmdlet and specify the Internal parameter.
- C. Copy the certificates to Azure Blob storage.
- D. Run the Test-AzureStack cmdlet and specify the -Group UpdateReadiness parameter.

Correct Answer: BD
