QUESTION 1

DRAG DROP

You have an Azure Stack Hub integrated system.

You install the Azure Gallery Packager (.azpkg) tool on a management workstation.

You need to define a custom Azure Stack Hub Marketplace item that will provision a virtual machine from a base image.

Which file should you configure for each requirement? To answer, drag the appropriate files to the correct requirements.

Each file may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Select and Place:

Files

CreateUIDdefinition.js

Manifest.json

UIDefinition.json

Answer Area

To specify the name, version, category, and icons of the Marketplace item:

To specify the publisher, SKU, offer, and version of the virtual machine image:

Correct Answer:

Files

CreateUIDdefinition.js

Answer Area

To specify the name, version, category, and icons of the Marketplace item:

UIDefinition.json

To specify the publisher, SKU, offer, and version of the virtual machine image:

Manifest.json

QUESTION 2

You have an Azure Stack Hub integrated system that connects to the internet.

You need to update the Azure Event Hubs service.

Solution: From the Updates blade of the administrator portal, you trigger the installation of the latest update listed in the Resource provider section.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

Instead: Solution: From a privileged endpoint (PEP) session, you run the Install-AzsUpdate cmdlet.

You can use the Azure Stack Hub administrative endpoints to monitor and manage your updates. They\\'re accessible with PowerShell. For instructions on getting set up with PowerShell on Azure Stack Hub.

You can use the following PowerShell cmdlet to manage your updates:

* Install-AzsUpdate

Apply a specific update at an update location.

QUESTION 3

DRAG DROP

You schedule a planned maintenance window.

You need to perform an Azure Stack Hub update in the dev1 region. The solution must meet the technical requirements.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Complete the activities identified in the Azure Stack Hub update activity checklist.

From the administrator portal, start the update process

From a privileged endpoint (PEP) session, run the Stop-AzureStack and Start-AzureStack cmdlets.

Download the required package and import the package to the respective storage account in the dev1 region.

Notify the users of the planned maintenance.

Answer Area

Correct Answer:

Actions

Answer Area

Complete the activities identified in the Azure Stack Hub update activity checklist.

Download the required package and import the package to the respective storage account in the dev1 region.

| From a privileged endpoint (PEP) session, run the `Stop-AzureStack` and `Start-AzureStack` cmdlets. | From the administrator portal, start the update process |

Notify the users of the planned maintenance.

QUESTION 4

You have a datacenter that hosts a Linux-based NTP server named ntp.contoso.com. The server has an IP address of 10.1.1.10.

You plan to deploy an Azure Stack Hub integrated system.

You need to configure the NTP server entry for the integrated system.

What should you use?

A. 10.1.1.10

B. ntp.contoso.com

C. 10.1.1.10.0x8

D. ntp.contoso.com.0x4

Correct Answer: B

QUESTION 5

You plan to install an update to an Azure Stack Hub integrated system.

You need to verify whether the integrated system is healthy, and whether you can apply the update. You must achieve the goal as quickly as possible. Solution: From a privileged endpoint (PEP) session, you run

Test-AzureStack-Group "Default".

Does this meet the goal?

A. Yes

B. No

Correct Answer: B
