**QUESTION 1****HOTSPOT**

You need to implement a security policy solution to authorize the applications. The solution must meet the security requirements.

Which service should you use to enforce the security policy, and what should you use to manage the policy settings? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Enforce the security policy:

- Microsoft Defender Application Control
- Microsoft Defender Application Guard
- Microsoft Defender Credential Guard
- Microsoft Defender for Endpoint

Manage the policy settings:

- Configuration profiles in Microsoft Intune
- Compliance policies in Microsoft Intune
- Group Policy Objects (GPOs)

Correct Answer:

Answer Area

Enforce the security policy:

- Microsoft Defender Application Control
- Microsoft Defender Application Guard
- Microsoft Defender Credential Guard
- Microsoft Defender for Endpoint

Manage the policy settings:

- Configuration profiles in Microsoft Intune
- Compliance policies in Microsoft Intune
- Group Policy Objects (GPOs)

QUESTION 2

Your network contains an Active Directory Domain Service (AD DS) domain named contoso.com. The domain contains three domain controllers named DC1, DC2, and DC3.

You connect a Microsoft Defender or identity instances to the domain.

You need to onboard all the domain controllers to Defender for identity.

What should you run the domain controllers?

- A. AzureConnectedMachineAgent,wsl
- B. MARAgentInstaller.exe
- C. Azure ATP Sensor setup.exe
- D. MAMSetup-AMD64.exe

Correct Answer: B

QUESTION 3

DRAG DROP

You have two physical servers named AppSrv1 and AppSrv2 and an unconfigured server named Server1. All the servers run Windows Server. Only Server1 can access the internet.

You plan to use Azure Site Recovery to replicate AppSrv1 and AppSrv2 to Azure.

You need to deploy the required components to AppSrv1, AppSrv2, and Server1.

Which components should you deploy? To answer, drag the appropriate components to the correct servers. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to

view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Components	Answer Area
<input type="text" value="The Azure Connected Machine agent"/>	To AppSrv1 and AppSrv2: <input type="text" value="Component"/>
<input type="text" value="An Azure Site Recovery configuration server"/>	
<input type="text" value="The Azure Site Recovery Mobility Service"/>	To Server1: <input type="text" value="Component"/>
<input type="text" value="The Microsoft Azure Recovery Services (MARS) agent"/>	

Correct Answer:

Components	Answer Area
<input type="text" value="The Azure Connected Machine agent"/>	To AppSrv1 and AppSrv2: <input type="text" value="The Azure Site Recovery Mobility Service"/>
<input type="text" value="An Azure Site Recovery configuration server"/>	
<input type="text" value="The Azure Site Recovery Mobility Service"/>	To Server1: <input type="text" value="An Azure Site Recovery configuration server"/>
<input type="text" value="The Microsoft Azure Recovery Services (MARS) agent"/>	

QUESTION 4

HOTSPOT

You have a server named Server1 that runs Windows Server.

On Server1, you create a Data Collector Set named CollectorSet1 based on the Basic template.

You need to configure CollectorSet1 to meet the following requirements:

Older performance counter logs must be overwritten by new ones.

Performance counter logging must stop if there is less than 500 MB of free disk space.

What should you configure for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

**Answer Area**

Older performance counter logs must be overwritten by new ones:

▼

The Configuration properties
The Data Manager properties
The Performance Counter properties

Performance counter logging must stop if there is less than 500 MB of free disk space:

▼

The Configuration properties
The Data Manager properties
The Performance Counter properties

Correct Answer:

Answer Area

Older performance counter logs must be overwritten by new ones:

▼

The Configuration properties
The Data Manager properties
The Performance Counter properties

Performance counter logging must stop if there is less than 500 MB of free disk space:

▼

The Configuration properties
The Data Manager properties
The Performance Counter properties

QUESTION 5**DRAG DROP**

Your network contains an Active Directory Domain Services (AD DS) domain. The domain contains a print server named Server1. All printers are deployed to users by using a Group Policy Object (GPO) named GPO1.

You deploy a new server named Server2.

You need to decommission Server1. The solution must meet the following requirements:

Migrate the shared printers to Server2 by using the Printer Migration Wizard.

Ensure that the users use the printers on Server2.

Minimize downtime for the users.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Decommission Server1.
Import the printers on Server2.
Deploy Windows Server Hybrid Cloud Print.
Export the printers on Server1.
Update the service principal name (SPN) of each printer.
Modify GPO1.

Answer Area

Correct Answer:

Actions

Deploy Windows Server Hybrid Cloud Print.
Update the service principal name (SPN) of each printer.

Answer Area

Export the printers on Server1.
Import the printers on Server2.
Modify GPO1.
Decommission Server1.
