QUESTION 1

correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure subscription that contains the following unused resources:

1.

20 user accounts in Azure Active Directory (Azure AD)

2.

Five groups in Azure AD

3.

10 public IP addresses

4.

10 network interfaces

You need to reduce the Azure costs for the company.

Solution: You remove the unused public IP addresses.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

You are charged for public IP addresses. Therefore, deleting unused public IP addresses will reduce the Azure costs.

QUESTION 2

HOTSPOT

Select the answer that correctly completes the sentence.

Hot Area:

Answer Area

	▼
Elasticity	
Geo-distribution	
High availability	
Scalability	

enables Azure resources to be deployed close to users.

Correct Answer:

Answer Area

	▼
Elasticity	
Geo-distribution	
High availability	
Scalability	

enables Azure resources to be deployed close to users.

Explanation:

Because of geo-distribution you can deploy apps and data to regional datacenters around the globe, thereby ensuring that your customers always have the best performance in their region.

QUESTION 3

This question requires that you evaluate the underlined text to determine if it is correct.

Azure Germany can be used by legal residents of Germany only.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice that makes the statement correct.

- A. no change is needed
- B. only enterprises that are registered in Germany
- C. only enterprises that purchase their azure licenses from a partner based in Germany
- D. any user or enterprise that requires its data to reside in Germany

Correct Answer: D

Azure Germany is available to eligible customers and partners globally who intend to do business in the EU/EFTA, including the United Kingdom.

Azure Germany offers a separate instance of Microsoft Azure services from within German datacenters. The datacenters are in two locations, Frankfurt/Main and Magdeburg. This placement ensures that customer data remains in Germany

and that the datacenters connect to each other through a private network. All customer data is exclusively stored in those datacenters. A designated German company--the German data trustee--controls access to customer data and the

systems and infrastructure that hold customer data.

QUESTION 4

DRAG DROP

A company plans to deploy Microsoft 365.

You need to identify differences between the features in Exchange Online and Exchange Server.

Match the appropriate features to the corresponding supported environments. To answer, drag the appropriate environments to the correct features. Each environment may be used once, more than once, or not at all. You may need to drag

the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Answer area	Supported environments
	Exchange Server only
	Exchange Online only
	Exchange Server and Exchange Online

Feature	Supported environments
Exchange Web Services (EWS) access to accounts	Supported environment
Custom EWS throttling settings	Supported environment
Information rights management, archiving, and legal holds	Supported environment

Correct Answer:

**Supported environments**

Exchange Server only

Exchange Online only

Exchange Server and Exchange Online

Answer area**Feature****Supported environments**

Exchange Web Services (EWS) access to accounts

Exchange Server and Exchange Online

Custom EWS throttling settings

Exchange Server only

Information rights management, archiving, and legal holds

Exchange Server and Exchange Online

QUESTION 5

Note: The question is included in a number of questions that depicts the identical set-up. However, every question has a distinctive result. Establish if the solution satisfies the requirements.

You are planning a strategy to deploy numerous web servers and database servers to Azure.

This strategy should allow for connection types between the web servers and database servers to be controlled.

Solution: You include the Azure Service Bus in your strategy.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B
