QUESTION 1

Universal Containers (UC) uses Sales Cloud, Service Cloud, and Experience Cloud. The implementation was completed 5+ years ago, and Service Cloud users are now expressing dissatisfaction with system performance. A custom Visualforce page was developed to show relevant data to Experience Cloud users. The same page is used by the Support team but displays more information based on their profile. UC has a small internal Support team for Salesforce that periodically enables new features in production.

Which best practice should the Solution Architect recommend to avoid these types of issues in the future?

- A. Assess the level of technical debt and test new features with the Product team in a Developer sandbox.
- B. Assess the level of technical debt and test new features in a sandbox before enabling in production.
- C. Assess the level of data quality and test new features with a pilot before enabling for all users.
- D. Assess the level of data quality and test new features with a subset of users in production before enabling all users.

Correct Answer: C

QUESTION 2

Northern Trail Outfitters (NTO) currently use Sales Cloud to track deals and now wants to use channel sales to distribute and sell products through resellers (partners). As part of the channel strategy, NTO will be implementing a Partner Community for resellers to register deals or generate quotes. NTO needs to establish metrics to measure each reseller's performance based on the reseller's activities within the Partner Community. NTO wants to focus on leading metrics as opposed to lagging metrics to get early feedback on how the portal is being used by partners.

Which three leading metrics should a Solution Architect recommend to help NTO measure each reseller's goals through the Partner Community?

Choose 3 answers

- A. Product types sold
- B. Opportunities generated
- C. Number of quotes generated
- D. Logins into Partner Community
- E. Opportunity win rates

Correct Answer: BCD

QUESTION 3

Universal Containers (UC) is starting to go through an inventory of capabilities in regard to its many data warehouses. UC's data warehouses are currently being provided with data from OMS, ERP, Accounting, and other inventory management systems. Data warehouses are utilized by those systems for storage or analytics purposes.

UC plans to utilize the Systems of Engagement framework to classify its systems based on how they will be utilized within the enterprise architecture. UC would like to understand which systems it should directly integrate with versus utilizing the data warehouses where that data may also be stored.

How should a Solution Architect classify the data warehouses as systems within the enterprise architecture of this scenario?

- A. System of Reference
- B. System of Engagement
- C. System of Intelligence
- D. System of Record

Correct Answer: D

QUESTION 4

Universal Containers (UC) needs to support its customers via email, phone, and chat. Service agents are only scheduled to support one communication channel for each shift. UC has implemented a service-focused community but only wants customers to inquire about service in the community through chat.

Which three options should a Solution Architect recommend to meet the requirements defined above?

Choose 3 answers

- A. CTI adaptor with Omni-Channel integration
- B. Customer Community with ability to create a new support Case
- C. Experience Cloud, web-to-case, and a CTI integration
- D. Omni-Channel with defined presence, routing configurations, and Service Channels
- E. Customer Community with Live Agent

Correct Answer: ABE

QUESTION 5

Northern Trail Outfitters (NTO) has around 500,000 active customers stored in the Account object. NTO gets an average of two orders per customer each month from both internal and online sales channels. NTO is expecting growth of 15% year-over-year (YoY). Various NTO users have recently started complaining about slower performances while accessing order information or running reports. NTO customers are also seeing slower responses while accessing their order history on B2B Commerce.

Which two options should a Solution Architect consider to improve performance?

Choose 2 answers

- A. Develop an archiving strategy around order records from Salesforce based on a criteria that works with customer.

- B. Enable reporting snapshots to store summarised information.
- C. Create a custom component to display all order information.
- D. Use external objects instead of standard B2B Commerce Order object.

Correct Answer: AB
