QUESTION 1

The Client wishes to implement a third party integration that allows for free shipping if the customer is a member of the third party service. When the customer's order is exported to the Order Management System (OMS) it also creates a custom object in order to track additional data before sending that order data to the third-party service as well.

What technical concern should the Architect raise to protect performance and stability of the site?

- A. The customer order quota and related retention or deletion needs.
- B. The customer's order data sent to a third-party and related security needs.
- C. The OMS having order data sent to a third party and related security needs.
- D. The custom object quota and related retention or deletion needs.

Correct Answer: D

QUESTION 2

An Architect is documenting the technical design for a single B2C Commerce storefront. The Client has a business requirement to provide pricing that is customized to specific groups:

- 1.
50 different pricing groups of customers
- 2.
30 different pricing groups of employees
- 3.
10 different pricing groups of vendors

Which items should the Architect include in the design in order to set applicable price books based on these requirements?

Choose 2 answers A. 1. 50 customer groups for customers

- 2.
30 customer groups for employees
- 3.
10 customer groups for vendors

B. 1. One customer group and 30 subgroups for customers

- 2.
One customer group and 30 subgroups for employees

3.

One customer group and 10 subgroups for vendors

C. One campaign and multiple promotions for each customer group

D. 1. One promotion and 50 campaigns for customers

2.

One promotion and 30 campaigns for employees

3.

One promotion and 10 campaigns for vendors

Correct Answer: AB

QUESTION 3

Northern Trail Outfitters (NTO) wants to migrate its online shop from a custom ecommerce platform to B2C Commerce. NTO needs to migrate several thousands of customer records profile information, address book). WTO can provide a B2C Commerce feed. It is currently using SHA-256 as an encryption mechanism for the customer passwords.

What approach can the Architect propose?

A. Import the customer records, including the hashed password, as B2C Commerce supports SHA-256, and they will be able to login with their existing password.

B. Do not import customer records and ask customers to create new accounts the first time they try to log in to the B2C Commerce storefront.

C. Import the customer records, excluding the password field, and B2C Commerce will automatically require a password reset the first time a customer logs in to the storefront.

D. Import the customer records, with the hashed password as a custom attribute, and during the login compare the entered password with the hashed password and save it in the password field.

Correct Answer: D

QUESTION 4

A client has a single site with multiple domains, locales, and languages. After launch, there is a need for the client to perform offline maintenance. The client would like to show the same maintenance page for each locale. Which version of aliases.json file below will accomplish this task?

- A. {
 "nto.net": "www.nto.net",
 "nto.eu": "www.nto.eu",
 "nto.event.eu": "www.nto.eu"
}
- B. {
 "www.nto.eu": "www.nto.eu"
}
- C. {
 "nto.eu": "www.nto.eu",
 "nto.at": "www.nto.at",
 "nto.de": "www.nto.de"
}
- D. {
 "nto.eu": "www.nto.eu",
 "nto.at": "www.nto.eu",
 "nto.de": "www.nto.eu"
}

- A. Option A
B. Option B
C. Option C
D. Option D

Correct Answer: D

QUESTION 5

Northern Trail Outfitters uses an Order Management system (OMS), which creates an order tracking number for every order 24 hours after receiving it. The OMS provides only a web-service interface to get this tracking number. There is a job

that updates this tracking number for exported orders, which were last modified yesterday.

Part of this jobs code looks like the following:

Based on the above description and code snippet, which coding best practice should the Architect enforce?

- A. Post-processing of search results is a bad practice that needs to be corrected.
B. The transaction for updating of orders needs to be rewritten to avoid problems with transaction size.

C. Configure circuit breaker and timeout for the OMS web service call to prevent thread exhaustion.

D. Standard order import should be used instead of modifying multiple order objects with custom code.

Correct Answer: C
