QUESTION 1

The Client wishes to implement a third party integration that allows for free shipping. If the customer is a member of the third party service. When the customer's order is exported to the Order Management System (OMS) it also creates a custom object in order to track additional data before sending that order data to the third-party service as well.

What technical concern should the Architect raise to protect performance and stability of the site?

- A. The customer order quota and related retention or deletion needs.
- B. The customer's order data sent to a third-party and related security needs.
- C. The OMS having order data sent to a third party and related security needs.
- D. The custom object quota and related retention or deletion needs.

Correct Answer: D

QUESTION 2

The Client is Crowding and decided to migrate its ecommerce website to B2C Commerce. The Client provided the Architect with the following metrics for its existing website over the past 12 months and forecasted into the next year:

Average visits per hour	500
Peak visits per hour	1000
Average page views per hour	10000
Peak page views per hour	20000
Average orders per hour	100
Peak orders per hour	250
Average items per order	2.1
Average order value	300 USD
Expected growth percentage	300

Noting these historical metrics and the forecasted growth of 300%, which load test targets meet best practices for testing the new B2C Commerce site?

- A. 15000 visits per hour, 300000 page views per hour, and 3750 orders per hour
- B. 150000 visits per hour, 3000000 page views per hour, and 37500 orders per hour
- C. 1500 visits per hour, 30000 page views per hour, and 375 orders per hour
- D. 3000 visits per hour, 60000 page views per hour, and 750 orders per hour

Correct Answer: C

QUESTION 3

A developer is validating the pipeline cache and noticed that the PDP page is very low cached. The one parameter is showing the position on the product listing page upon checking the site and code. What should the developer adjust in order to improve the page cache hit ratio, keeping in mind that the client is insisting on the parameter for their analytics?

- A. Rework the implementation so it reads the parameter on client-side, passes it to the analytics and exclude it from cache parameters.
- B. Add the key to the cache exclude parameters.
- C. Rework the implementation so it doesn't depend on that parameter.
- D. Rework the implementation so the parameter is not passed in the URL and is read from the URL hash.

Correct Answer: B

QUESTION 4

A B2C Commerce developer has implemented a job that connects to an SFTP, loops through a specific number of .csv files and generates a generic mapping for every file. In order to keep track of the mappings imported, if a generic mapping is created successfully, a custom object instance is created with the .csv file name. After running the job in the Development instance, the developer checks the Custom Objects in Business Manager and notices there isn't a Custom Object for each csv file that was on SFTP.

What are two possible reasons that some generic mappings were not created? Choose 2 answers A. The maximum number of generic mappings was reached.

- B. The generic mappings definition needs to be replicated from Staging before running the job.
- C. Invalid format in one or more of the .csv files.
- D. The job needs to run on Staging and then replicate the generic mappings and custom objects on Development

Correct Answer: AC

QUESTION 5

A B2C Commerce developer has recently completed a tax service link cartridge integration into a new SHU site. During review, the Architect notices the basket calculation hook is being run multiple times during a single tax call. What is the reason for the duplicate calculations being run?

- A. The tax call is being called multiple times.
- B. The LINK cartridge is included multiple times in the cartridge path.
- C. There are multiple hook.js files referring to the same hook.
- D. The checkout is designed to recursively refer to the same hook.

Correct Answer: A
