QUESTION 1

An Architect to notify by the Business that order conversion dramatically dropped a few hours after go live. Further investigation points out that customers cannot proceed to checkout anymore. The Architect is aware that a custom inventory check with a third-party API is enforced at the beginning of checkout, and that customers are redirected to the basket page when items are no longer in stock

Which tool can clearly confirm that the problem is indeed caused by the inventory check?

- A. Sales Dashboard from Reports and Dashboards
- B. Service Status from Business Manager
- C. Pipeline Profiler from Business Manager
- D. Realtime Report from Reports and Dashboards

Correct Answer: B

QUESTION 2

A new dent is moving from their existing ecommerce platform to B2C Commerce. They have an existing service that connects to the Email Marketing System. The endpoint of the service can directly parse the data posted by the customer from the Storefront page for marketing materials subscriptions. It is required that the service implementation on the B2C Commerce site supports authentication and encoding.

What type of service should the Architect document this new service as?

- A. HTTP
- B. HTTP Form
- C. Generic
- D. SOAP

Correct Answer: D

QUESTION 3

During a review of the most recent release notes, the Architect finds that Salesforce has deprecated an API that is used throughout the site. After reviewing the deprecated API usage in Business Manager, the Architect narrows down the usage of that API to a particular LINK integration cartridge. The cartridge was integrated when the site was first launched and is heavily customized for the Client.

What is the recommended way for the Architect to remove the deprecated API so the LINK integration continues to work without interruptions, and lowest level of effort?

- A. The Architect should update all the deprecated API calls in the already integrated LINK cartridge and test thoroughly.
- B. The Architect does not need to do anything at this time, the API will continue to work with no issues for the

foreseeable future.

C. The Architect should check to see if the LINK cartridge has been updated already, integrate it, apply the customisations, and test thoroughly.

D. The Architect should contact the company that created the LINK cartridge to fix the issue and provide the client with updated code.

Correct Answer: C

QUESTION 4

The development team is building a complex LINK cartridge for a hosted checkout solution. The provider's database is used as a single source of truth, but the information in the Basket on B2C Commerce side needs to be synchronized. This

is implemented asynchronously the back end when the customers interact with the hosted checkout page and change their shipping/bidding details.

As an Architect you have to advise the development team with how to implement the logging to ensure that there will be a mechanism available to allow troubleshooting in the case something goes wrong on production.

Which solution should the Architect suggest?

A. Report info level message for the back-end asynchronous communication between both systems. Report all errors at error level message.

B. Report debug level message for the back-end asynchronous communication between both systems. Report all errors at error-level message.

C. Get logger for cartridge specific category. Report debug level message for the back end asynchronous communication between both systems. Report all errors at error level message.

D. Get logger for cartridge-specific category. Report Info level message for the back-end asynchronous communication between both systems. Report all errors at error level message.

Correct Answer: D

QUESTION 5

A business wants to migrate its customer service provider from provider A to provider B. Provider B offers a LINK cartridge to integrate with its commerce solution. Which three artifacts need to be created by the Architect? Choose 3 answers

A. Document the design of implementing a new B2C Commerce cartridge following the industry standard best practices

B. Document the data objects, the interface, and data synchronization frequency between the systems.

C. Document the data mapping between commerce and customer service provider.

D. Document the customizations required on top of the LINK cartridge based on current commerce implementation and business needs.

E. Document how the customer online journey flow from landing on the page to placing of the order

Correct Answer: BCD
