---

### QUESTION 2

A developer is implementing new Page Designer content on a merchant's Storefront and adds the line below to the setupContentSearch function in the searchHelpers.js file.

```
apiContentSearchModel.setFilteredByFolder(false);
```

What does this achieve?

- A. Filters Page Designer search results into folders
- B. Prevents Page Designer pages from being searchable
- C. Allows Page Designer pages and components to be searchable
- D. Allows filtering Page Designer pages by folder

Correct Answer: D

---

### QUESTION 3

Universal Containers wants to give customers the ability to refine product search results by a product custom attribute, weightCapacity. Which series of steps should a Digital Developer take to show this refinement on the storefront?

- A. Define a sorting rule for weightCapacity, then rebuild the product search index.
- B. Define a search refinement for weightCapacity, then rebuild the product search index.
- C. Define search-suggestion buckets for weightCapacity, then rebuild the product search index.
- D. Define a search refinement for weightCapacity, then clear the page cache segment for Search- Show.

Correct Answer: B

#### QUESTION 4

Universal Containers requires that a new order comments attribute is added to the existing SiteGenesis checkout flow. This new attribute needs to be included as part of the standard order export. Aside from updating the HTML markup and form definition, which option contains all necessary steps to achieve this task?

- A.
  - Add the new attribute to the "Order" system object.
  - Modify the "COPlaceOrder" controller to add this new attribute to the current session's "Order" object.
- B.
  - Add the new attribute to the "Customer" system object.
  - Modify the "COPlaceOrder" controller to add this new attribute to the current session's "Customer" object.
- C.
  - Modify the "COPlaceOrder" controller to update a CSV file in the IMPEX WebDAV directory with the order ID and comments.
  - Modify the order export process to read information in the CSV file and include it as part of the export.
- D.
  - Create a new custom object type for order comments that contains the attributes: order ID and comments.
  - Modify the "COPlaceOrder" controller to create a new order comments custom object upon order completion.

A. Option A

B. Option B

C. Option C

D. Option D

Correct Answer: B

#### QUESTION 5

A Digital Developer is implementing an Open Commerce API call to add products to a basket. Given the following resource configuration:

```
{
  "resource_id": "/baskets/**",
  "methods": ["get"],
  "read_attributes": "(**)",
  "write_attributes": "(**)"
}
```

Which modification allows the requests to successfully execute?

- A. Change the "resource\_id" value to: "/baskets/\*/items".
- B. Change the "write\_attributes" value to: "(+items)".
- C. Change the "read\_attributes" value to: "(items)".
- D. Change the "methods" value to: ["get", "post"].

Correct Answer: A
