## QUESTION 1

To ensure SFRA best practices and protect against request forgery, the developer introduced CSRF token generation in the customer address form.

```
<form ... action="submit">
  <input name="$(dw.web.CSRFProtection.getTokenName())"
    value="$(dw.web.CSRFProtection.generateToken())">
  ...
  <the rest of the Form Fields>
  ...
</form>
```

To implement CSRF protection when the form is submitted, the developer needs to introduce the CSRF validation using one or both of these methods as applicable:

1.

validateRequest

2.

validateAjaxRequest

Where in the code does the developer need to add this CSRF validation check?

- A. In the middleware chain of the controller post route
- B. In the controller function that displays the form
- C. In the model function that persists the form data
- D. In the view function that handles the submitted form

Correct Answer: A

## QUESTION 2

Given a B2C Commerce client with these specifics:

1.

Sells in two different countries: US and IN

2.

Uses only the English language

A developer has a requirement to add a new field to the IN registration form that must not appear in the US one.

Which path should be created to accomplish this requirement?

- A. cartridge/forms/profile\_en\_IN.xml
- B. cartridge/forms/profile\_in.xml
- C. cartridge/forms/in/profile.xml
- D. cartridge/forms/en\_IN/profile.xml

Correct Answer: D

### QUESTION 3

The following code ensures that an address ID CANNOT be used if it is already in use by another address in the customer's address book. There is a problem with the code. The error message for an invalid address ID is never shown to the user on the form field.

```
if (address.ID !== addressForm.addressid.value) {  
  for (var i = 0; i < addressBook.addresses.length; i++) {  
    if (addressBook.addresses[i].ID === addressForm.addressid.value) {  
      addressForm.invalidateFormElement();  
      throw new Error('Address name already exists');  
    }  
  }  
}
```

How should the Digital Developer resolve this issue so that the error message is displayed on the address ID form field?

- A. addressForm.invalidateFormElement("addressid");
- B. addressForm.addresssid.invalidateFormElement = true;
- C. addressForm.invalidateFormElement(addressForm.addressid);
- D. addressForm.addresssid.invalidateFormElement();

Correct Answer: C

### QUESTION 4

Universal Containers wants to change a content slot that is currently configured to display a content asset. Now they want the slot to display the top five selling boxes for the week. Which two changes need to be made for this to occur? (Choose two.)

- A. Change the slot's configuration content type to "products."
- B. Change the slot's configuration content type to "recommendations."

- C. Change the slot's configuration template to the appropriate rendering template.
- D. Delete the existing content asset.

Correct Answer: BC

---

#### QUESTION 5

A developer needs to share their sandbox data with a colleague working on the same realm. What is the best practice to share data between two environments?

- A. Perform a site export and a local site import
- B. Perform a data replication from one sandbox to the other
- C. Perform a site export using the global export directory
- D. Perform a site export using the remote archive

Correct Answer: A
